

Honeywell

Delivering innovation in technology and best-in-class support

Honeywell Aerospace is a leading global provider of integrated avionics, engines, systems and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space and airport operations. Our aerospace products can be found on virtually every type of aircraft in use, in nearly every region of the world. In the air and on the ground our primary focus is to enhance customer value by making flight safer, more reliable and more cost-effective through a vast array of products and services.

CAE – enhancing our clients’ safety and efficiency

CAE is a leading provider of integrated training solutions and modelling and simulation technologies. For six decades, we have created world-renowned simulation-based training equipment, and today we serve all segments of the aviation market through a training network that spans the globe. Every year, we train more than 75,000 pilots, crewmembers and maintenance technicians at our training facilities. They come for a practical, operationally relevant training experience on a broad selection of business, regional, and commercial aircraft models. Our innovative technology and training expertise, combined with our global footprint, allow us to bring training of the highest quality in the most advanced learning environment closer to your home base.

Honeywell-CAE Training Alliance

Honeywell

Combining our strengths to provide greater value

Two global leaders, a single source for exceptional pilot and technical training. That's the Honeywell-CAE Training Alliance.

As two of the aerospace industry's most trusted and respected names, Honeywell Aerospace and CAE have joined forces to deliver an unprecedented training experience for Honeywell avionics, engines, auxiliary power units, mechanical systems and specialized pilot seminars. The result is training that is seamless, consistent and global.

The Honeywell-CAE Training Alliance offers a broad range of pilot and technical training solutions. By combining Honeywell's technical expertise, and CAE's unparalleled training solutions, simulation technology and global footprint, Honeywell's customers will receive exceptional training for pilot, maintenance, flight operations and cabin systems.

Technology at its best

The Honeywell-CAE Training Alliance combines Honeywell's courseware, equipment and technical expertise, which are fundamental for a consistent and quality training experience, with CAE's unequalled expertise in integrated training solutions leveraging world-class simulation and modelling technologies. This ensures one of the most technologically advanced and comprehensive pilot and technical training offerings in the industry.

Globally accessible training

Honeywell's facility in Phoenix, Arizona has long provided customers training on its aerospace products and systems. With worldwide growth in aerospace and the demand for training close to home, the Honeywell-CAE Training Alliance offers customers the same high-quality training experience around the world throughout CAE's global network of training centers.

Qualified instructors

CAE's training centers will be staffed with highly qualified and experienced instructors, backed by the expertise and training support of Honeywell subject matter experts, ensuring the best training delivery and a learning experience that is standard—regardless of where you train. More importantly, training will be delivered by someone who has lived your operational reality, with hands-on experience in Honeywell products and systems and an in-depth knowledge of your aircraft.

**More training,
more often, in
more locations.**
