

The CAE Owl™ is a robust management tool designed to simplify the logistics behind managing simulation center activities and improve the efficiency of your operations. Our dynamic platform is user-friendly and completely web-based. The CAE Owl facilitates simulation activities for all user groups from preparing, running and recording events to annotating video, evaluating performance, reviewing and debriefing all activities.

### Recording, annotation and debriefing

- All digital video solution
- Ad-hoc and predefined video markers
- Stream and capture up to 6 camera or monitor feeds over the network
- Control activities in any room in your center from any location on the network

### Testing and assessment of simulation activities

- Create case content online from the comfort of your home or office
- Create web based assessments using our comprehensive questionnaire builder or our video marker based rules
- Associate skills to cases, questionnaires or specific questions for easy reporting on performance

### Logistics

- Manage resources from simulators down to cameras and props
- Schedule activities in your center including booking rooms, resources and personnel
- Prevent double booking of rooms, resources and personnel

### Highlights

- Flexible. Scalable. Robust.
- Experience truly flexible high quality video recording
- Train In-Situ or in your simulation center using our mobile solution.
- Centralize all participant data and recorded sessions

# CAE Healthcare Simulation Centres

CAE Healthcare can provide you with operational peace of mind by efficiently handling every aspect of the day-to-day operation of a training centre, from scheduling to delivery of courses and everything in between. We can manage a centre, identify practice gaps and optimize resources, commercialize spare time (CST), design and develop educational solutions, simulate/model systems and processes, and evaluate clinical outcomes.

	<p style="text-align: center;"><b>Faculté de médecine</b></p> <p style="text-align: center;"><b>Université  de Montréal</b></p>
<p>CAE Healthcare has collaborated with the Michener Institute for Applied Health Sciences to establish and manage the CAE-Michener Center for the Advancement of Simulation and Education, which is expected to train more than 1,500 students and healthcare practitioners per year. This center provides state-of-the-art OSCE and simulation suite facilities as well as simulation-based education programs and can host any external clients who need prime simulation space for training or examinations</p>	<p>Together with the University of Montreal, CAE Healthcare offers a novel continuing professional education program to accelerate the adoption of clinical resource management principles by healthcare teams.</p> <p>The University of Montreal simulation center trains all undergraduate medical students in both technical and soft skills. By working with the university's faculty, CAE Healthcare develops simulation-based undergraduate medical training workshops for 240 students every week, ramping up to 720 students per week by 2011. The center is ready to host external clients on evenings and weekends.</p>
	
<p><i>“Our alliance with CAE will build upon our respective strengths to offer leading-edge and cost-effective professional development to healthcare practitioners. The CAE-Michener alliance will bring simulation excellence from the aviation industry to healthcare and create simulation-based education programs that will graduate a wide variety of qualified healthcare professionals. Our alliance will be one of the first in North America to specialize in providing inter-professional simulation education for integrated healthcare teams, including health professionals.”</i></p> <p>– Dr. Paul Gamble, President and CEO, Michener Institute for Applied Health Sciences.</p>	<p><i>“We are proud to be one of the first to use CAE’s extensive knowledge in simulation-based training to create, together, courses that will radically change the way healthcare practitioners are trained today. We look forward to continuing to collaborate with CAE for other training solutions.”</i></p> <p>– Dr. Jean Lucien Rouleau, Dean, Faculty of Medicine, Université de Montréal and President of the Réseau Universitaire Intégré de Santé (RUIS)</p>
