

Flight Management Solutions

Enabling the connected flight throughout the management process

Flight Management Solutions combine the core functions of flight operations to deliver seamless integration and increased productivity. By establishing a shared operational picture, business aircraft operators can achieve maximum savings.

We can create optimized trips specific to Business Aviation in near real time relieving the Operations Team from the “burden” of building trips standard flights.

Moreover, understanding the highly fluid nature of Business Aviation our optimizer can run with as much or as little frequency as desired by Operators and can insert or remove legs on trips already built. This is a game changer and typically done by human intervention.

Finally, in the near future, we will take these optimized trips and automatically assign them based on pre-defined rules or parameters (both regulatory and business).

Key Benefits

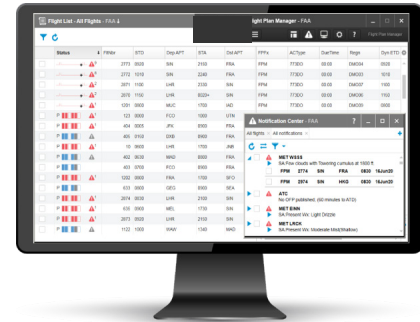

- **Dispatcher Review and Plan**
including pre-calculated flight, NOTAM, route weather overlays route building, and more
- **Dispatcher Release**
including eFlight Manager, ACARS and more
- **Pilot Review**
including weather and NOTAM update, Takeoff and Landing Report (TLR)*, request changes and more
- **Dispatcher Tracking**
including pre-calculated flight, weather, NOTAM, route weather overlays, route building and more

Flight Management Solutions

Flight Plan Manager

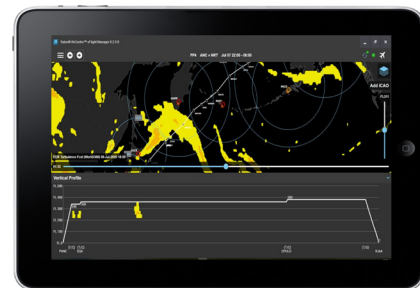

- Multi-variable, dynamic cost analysis and trajectory optimization
- Configurable flight planning automation and alerting
- Maximized Air Traffic Management (ATM) compliance

PLAN

eFlight Manager

- Mobile delivery of digital flight data to the flight deck
- Real-time downloads of latest flight data
- Synchronized aircraft and ground-based data

MANAGE

Flight Explorer

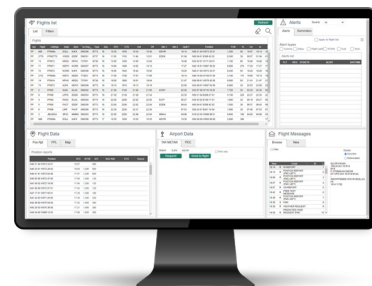

- Configurable views, customizable events and targeted alerting
- Tailored logs, record and playback, customizable by ops personnel
- Automatic distribution, enterprise access

TRACK

Operations Communication Manager

- Air-ground and ground-ground messaging
- Highly adaptable, flexible and compatible
- Accessible anytime and anywhere on web and mobile applications
