Helicopter Aviation Training

Confidence through
smarter training

Helicopter Aviation Training

CAE offers pilots one of the most advanced and respected training programs in the industry, covering a wide spectrum of Helicopter Aircraft types. For all your courses and through every stage of your pilot career, rely on CAE for consistent and standardized training of the highest caliber. Our Helicopter pilot training programs combine innovative methodologies, knowledgeable instructors and advanced simulation technology.

Specialized helicopter training services

CAE provides high quality training for both civilian and military customers for VFR, IFR, HEMS, SAR, offshore, military operations, NVG and other mission specific training.

CAE offers standardized type rating courses in accordance with many different regulatory authorities worldwide. Approved instructors with broad operational experience form the core of the training delivery team bringing expertise and knowledge to trainees both for practical and theoretical training modules.

While standardized modular recurrent training is available, much recurrent helicopter training is customized to meet the operational requirements or specific needs of different helicopter operators. A consultative and flexible approach is employed to ensure that the needs of CAE's customer are understood and the optimum training solution provided.

Superior centers

CAE's global network of training centers offer the latest technologies and training methodologies, along with unparalleled service. Our dedicated helicopter aviation training centers boast fully integrated state-of-the-art multiscreen CAE Simfinity™ classrooms, full-flight simulators and training devices, modern briefing rooms and comfortable lounges.

Each center delivers the same high level of instruction, service, courseware and technology that distinguishes CAE as a global leader in aviation training and services.

Why train with CAE

- Highest safety standards
- Tailored programs to meet your needs
- Cost-efficient training
- Conveniently located training centers
- Unsurpassed attention and service
- Modern, comfortable facilities
- Curriculum approved by regulatory authorities from around the world, such as ANAC, EASA, CASA, FAA, GACA and Transport Canada
