

Allegiant selects Flightscape as next-generation airline operations platform to support growth

Montreal, Canada, July 7, 2025 – (NYSE: CAE; TSX: CAE) – CAE today announced that it has signed a long-term contract with Allegiant (NASDAQ: ALGT) which will allow the airline to transform its operational intelligence and performance by using Flightscape – Powered by CAE. Flightscape is a data-driven platform that enables airlines to effectively manage operations, adapt seamlessly to challenges and mitigate disruptions, optimizing efficiency and costs, even in the most complex and time-sensitive situations. Allegiant has selected the Crew Management and Operations Management modules, and implementation of these two next-generation solutions has already begun.

“We are excited to partner with CAE and know Flightscape will be a valuable platform to optimize our operational efficiency,” said Tyler Hollingsworth, Allegiant COO. “Integrating this new technology equips our teams with richer data and insights that help minimize travel disruptions for our customers. Flightscape will enhance our customer experience as we continue to provide safe and reliable air service.”

“We are thrilled about this partnership with Allegiant and extremely proud to be supporting their growth with Flightscape’s next-generation solutions,” explained Pascal Grenier, Division President, Flightscape. “Over the past three years, CAE has invested in its airline operations platform: growing the offering, developing innovative products, enhancing customer service, forging new partnerships, and improving processes and technology. We are very excited to offer airlines around the world, like Allegiant, a fully integrated system with the very latest technology to help improve profitability and operate more efficiently, allowing them to stay ahead of the curve.”

About Flightscape

Flightscape is built on a modular architecture enabling airlines to deploy the solutions they need for operations control, crew management, flight management, airport management and in-flight service management. Modules can be deployed independently or together as part of a unified system.

In addition to the five modules, Flightscape’s Unified Task Board offers a centralized, role-specific dashboard that integrates data from multiple Operations Control Centre (OCC) systems to streamline critical decision-making and boost operational efficiency during time-critical situations. It generates legal, cost-effective solutions for disruption scenarios for common and complex day-of-operations challenges for any of the linked solutions – all in real-time.

Delivered as a cloud-based SaaS, Flightscape provides a more agile, cost-effective, and future-proof solution than proprietary software, ensuring continuous access to the latest features, security updates, and regulatory compliance without manual intervention. The system integrates easily with existing tools

via secure Application Programming Interfaces (APIs), and its architecture adapts to evolving technologies, making it a long-term, low-risk investment for modern airline operations.

Allegiant – Together We Fly™

Las Vegas-based Allegiant (NASDAQ: ALGT) is an integrated travel company with an airline at its heart, focused on connecting customers with the people, places and experiences that matter most. Since 1999, Allegiant Air has linked travelers in small-to-medium cities to world-class vacation destinations with all-nonstop flights and industry-low average fares. Today, Allegiant serves communities across the nation, with base airfares less than half the cost of the average domestic roundtrip ticket. About CAE

At CAE, we exist to make the world safer. We deliver cutting-edge training, simulation, and critical operations solutions to prepare aviation professionals and defence forces for the moments that matter. Every day, we empower pilots, cabin crew, maintenance technicians, airlines, business aviation operators, and defence and security personnel to perform at their best and when the stakes are the highest. Around the globe, we're everywhere customers need us to be with approximately 13,000 employees at around 240 sites and training locations in over 40 countries. For nearly 80 years, CAE has been at the forefront of innovation, consistently seeking to set the standard by delivering excellence in high-fidelity flight simulators and training solutions, while embedding sustainability at the heart of everything we do. By harnessing technology and enhancing human performance, we strive to be the trusted partner in advancing safety and mission readiness—today and tomorrow.
