

CAE BUSINESS AVIATION

The people
you trust.
The experience
you deserve.

Today and tomorrow, we make sure you're ready for the moments that matter.

At CAE, we believe that the future of Business Aviation begins with meeting today's needs while aggressively pursuing our vision to meet those of tomorrow. We balance high-level human expertise and cutting-edge technology to deliver training and operations solutions that equip operators, their pilots, and personnel across their entire ecosystem with the tools and knowledge they need to perform at their best, every day.

We constantly evolve how we achieve this, growing what is already the world's largest civil aviation training network to extend our reach and customer access: to today's highest fidelity in flight simulation, unmatched instructor-led pilot and maintenance technician training programs, and extensive portfolio of optimizing software and services. Our reputation grows too, as a team you can trust to deliver solutions and experiences that you expect and deserve, empowering your teams with the skills and confidence to consistently make better decisions, and take safer actions.

Advancing training quality and service at every level.

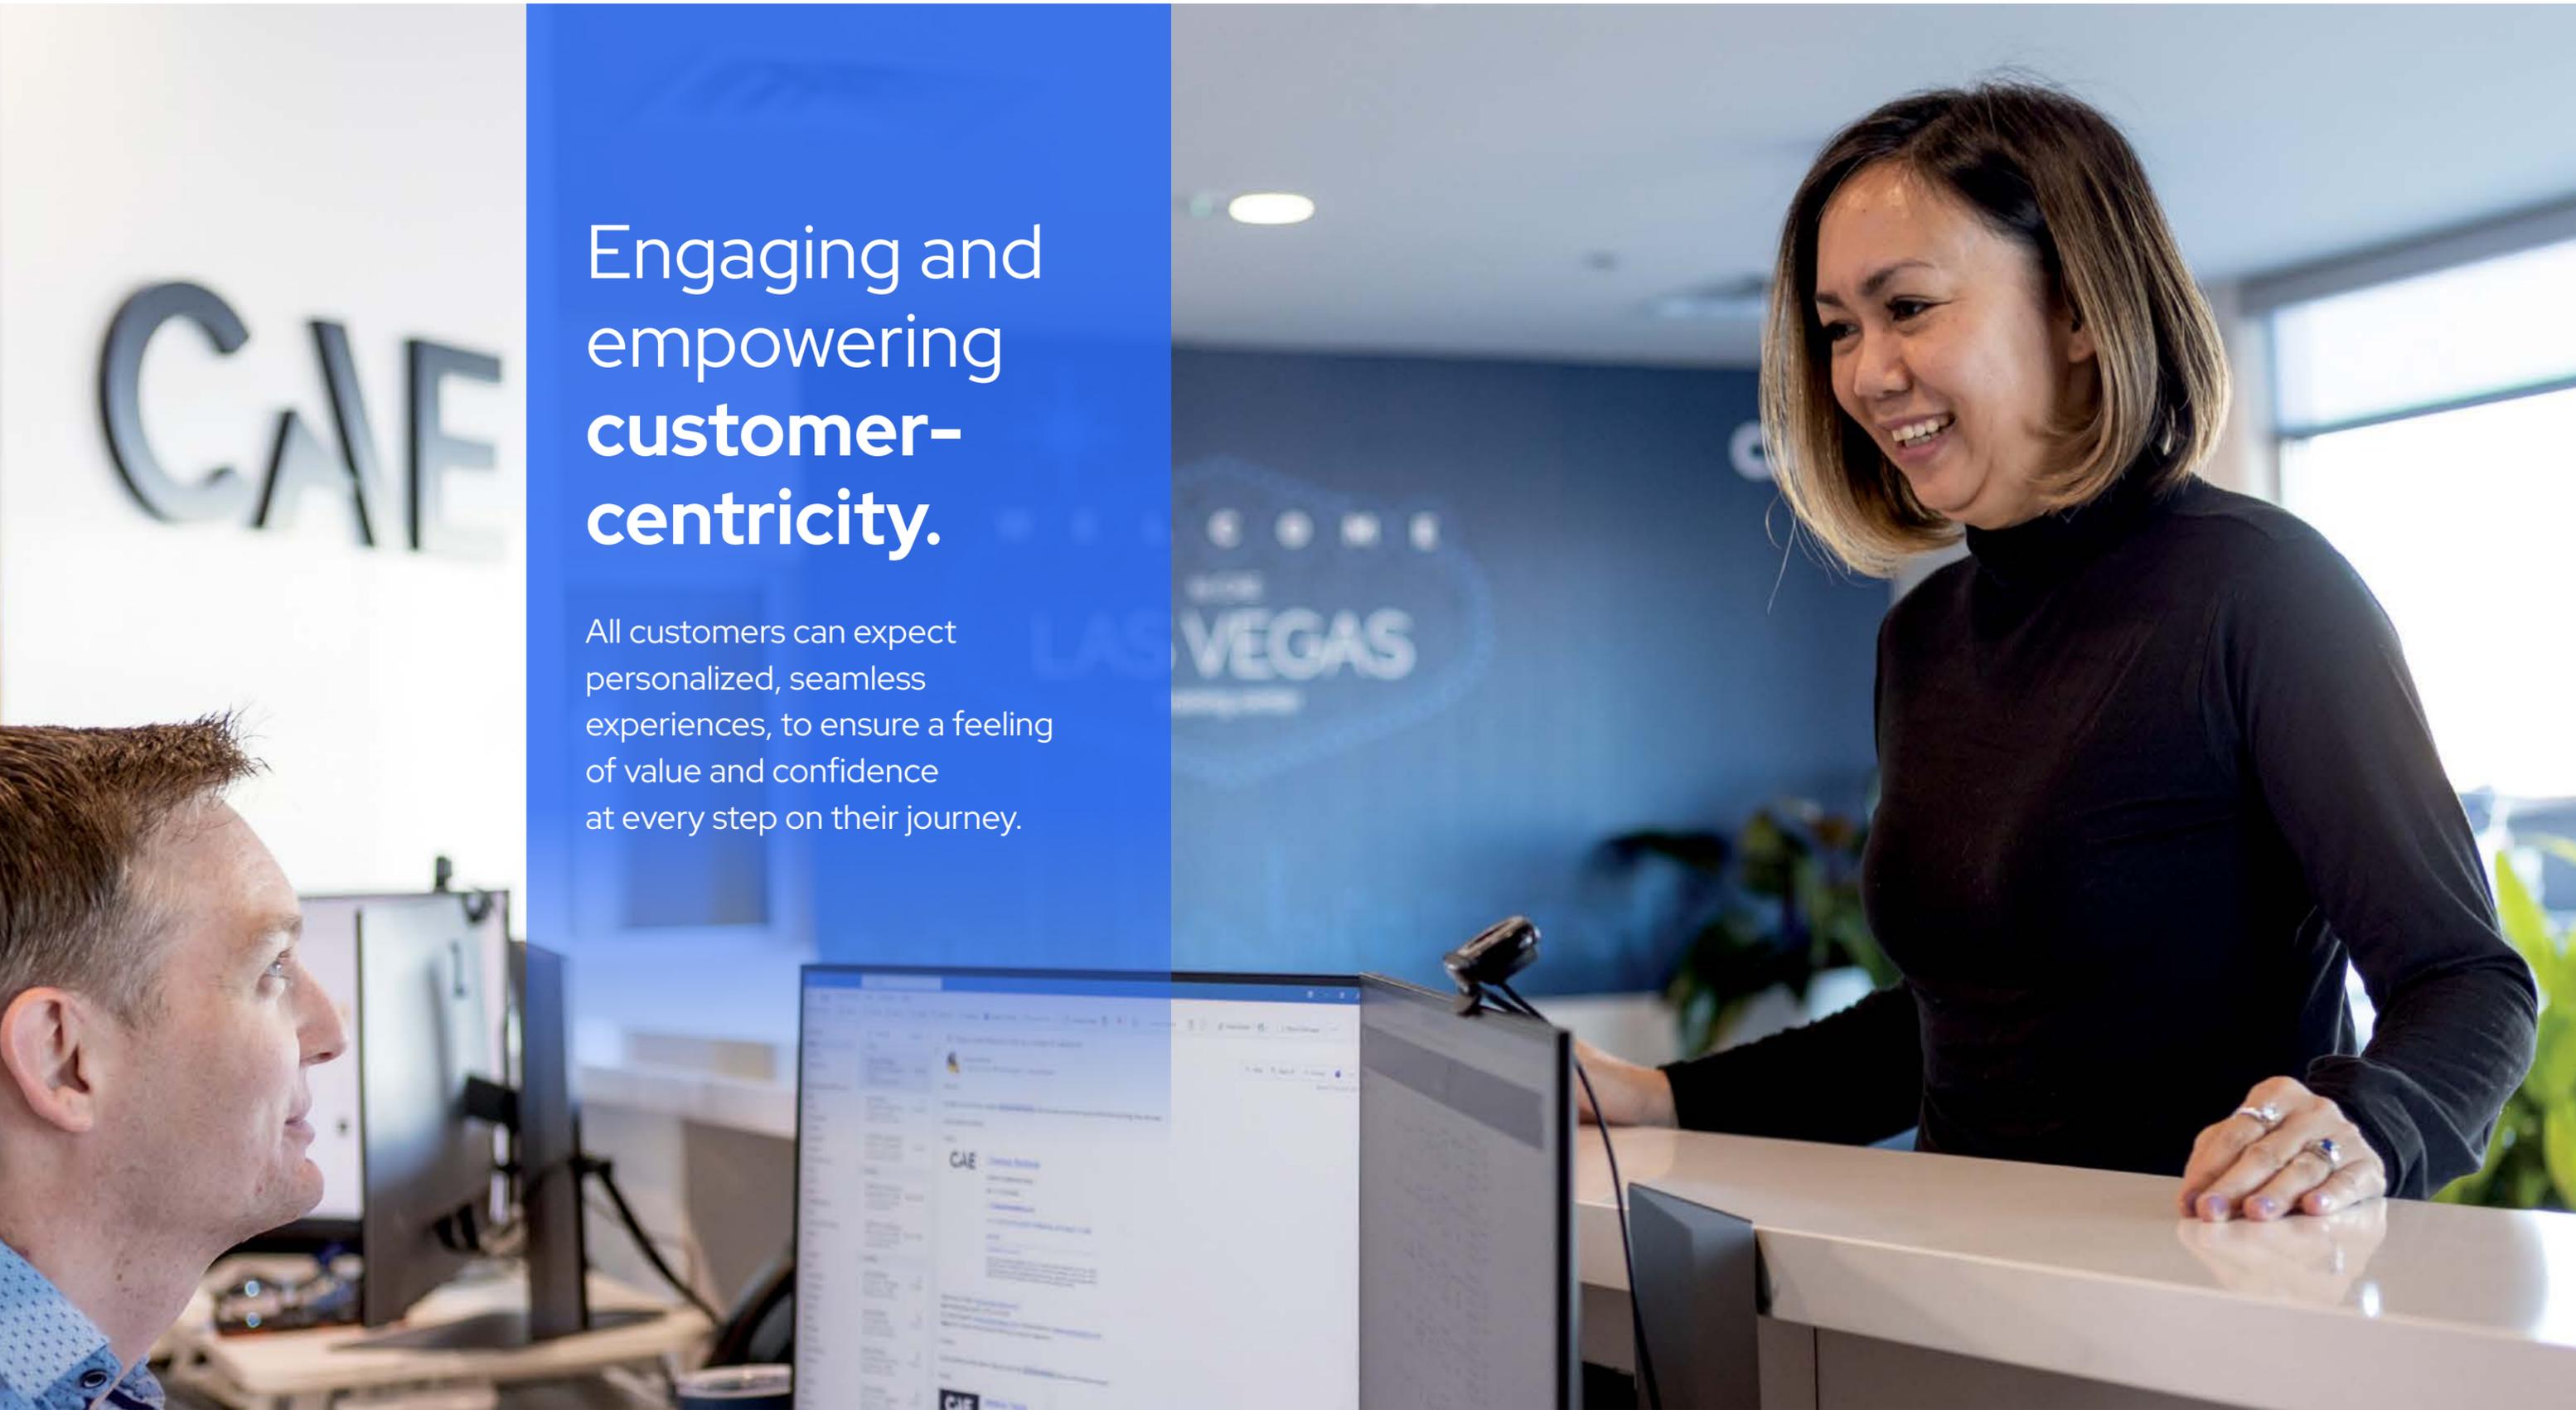

Combined with the expertise of our instructors, CAE's ever-evolving instructional tools and methodologies consistently deliver world-leading training experiences.

Delivering
cutting-edge
**instructor-
led training**
across business
aviation.

CAE's expert-instructed, tech-enabled, and data-powered approach delivers both individual and team excellence.

Engaging and empowering **customer-centricity.**

All customers can expect personalized, seamless experiences, to ensure a feeling of value and confidence at every step on their journey.

Industry-leading
simulation technologies
bringing flight
to life.

The gold standard in high-fidelity flight training, building on CAE's 75+ years of simulator innovation and experience.

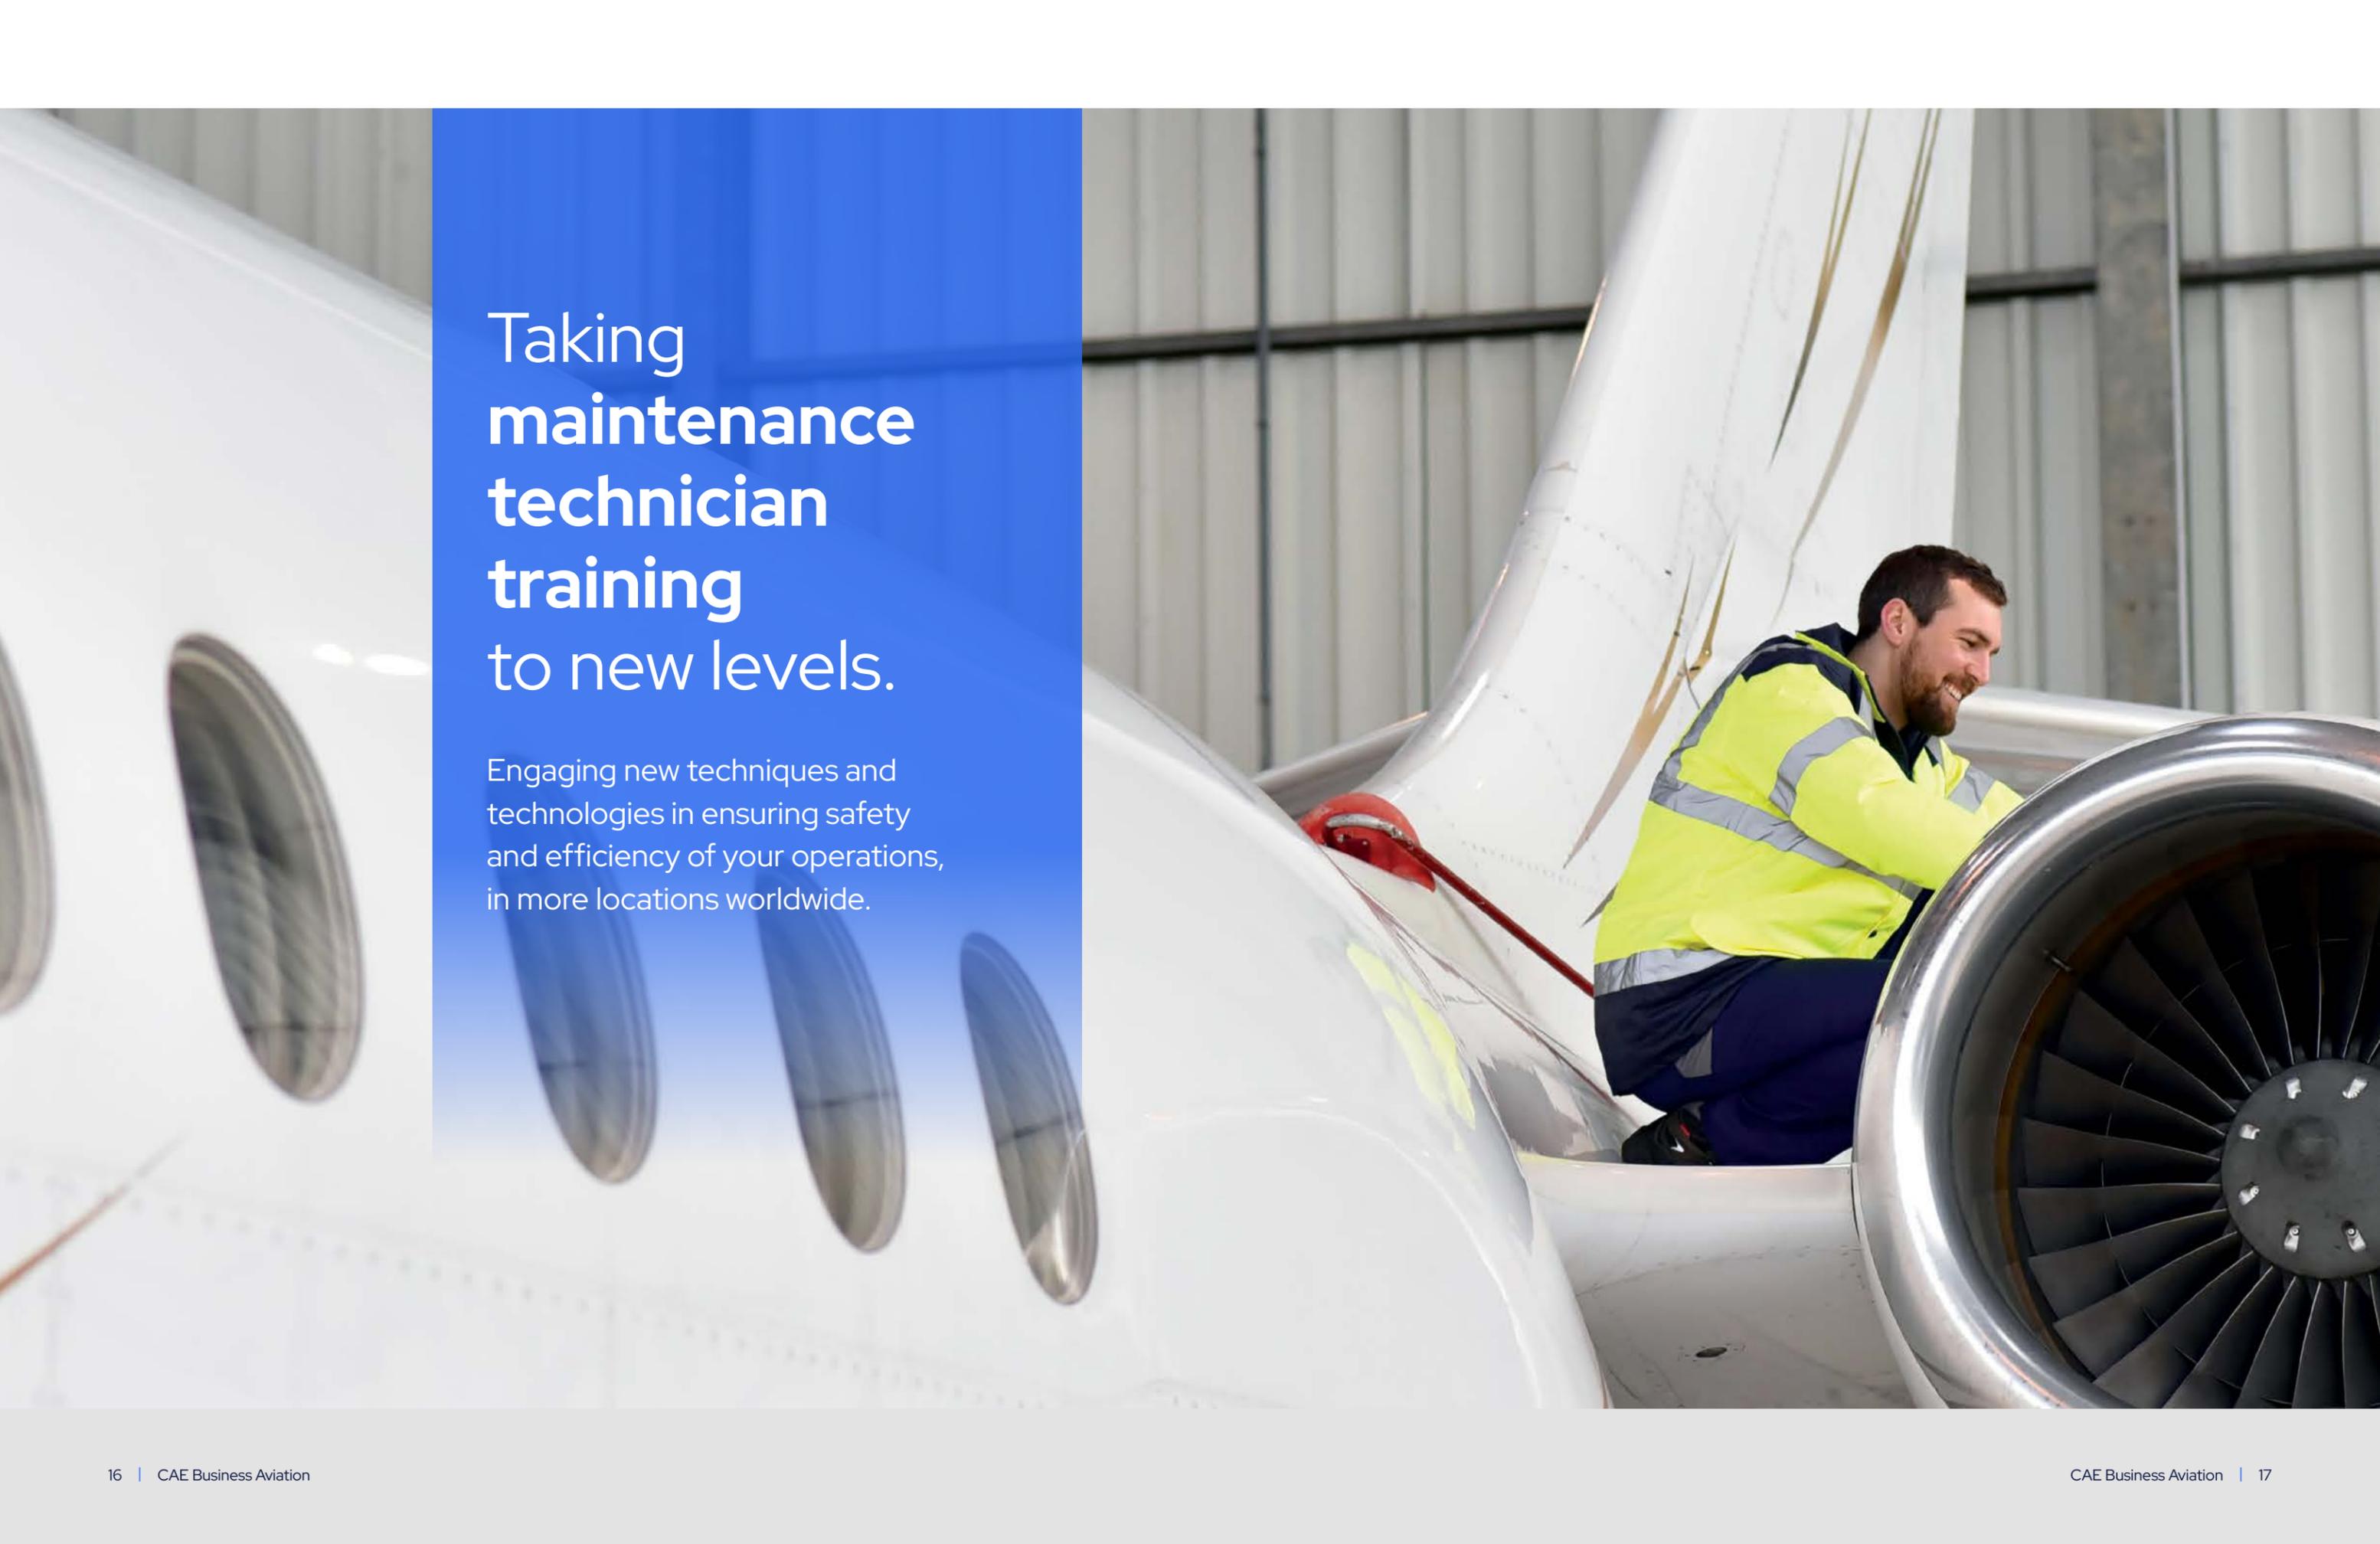

Enriching each pilot training experience.

Our expert-led, data-enabled and true-to-life training, leverages human experience combined with advanced technologies to meet all of your needs.

Optimizing **pilot performance** and confidence.

Count on consistent and standardized training across a broad spectrum of helicopter types, combining innovative CAE methodologies and advanced simulation technology.

Taking maintenance technician training to new levels.

Engaging new techniques and technologies in ensuring safety and efficiency of your operations, in more locations worldwide.

Achieving higher quality training with CORe, evolving how we train.

Innovative data-derived training—utilizing scenarios powered by CAE Rise™ data-driven insights—allows us to gain a deeper understanding of individual training needs and address them more effectively.

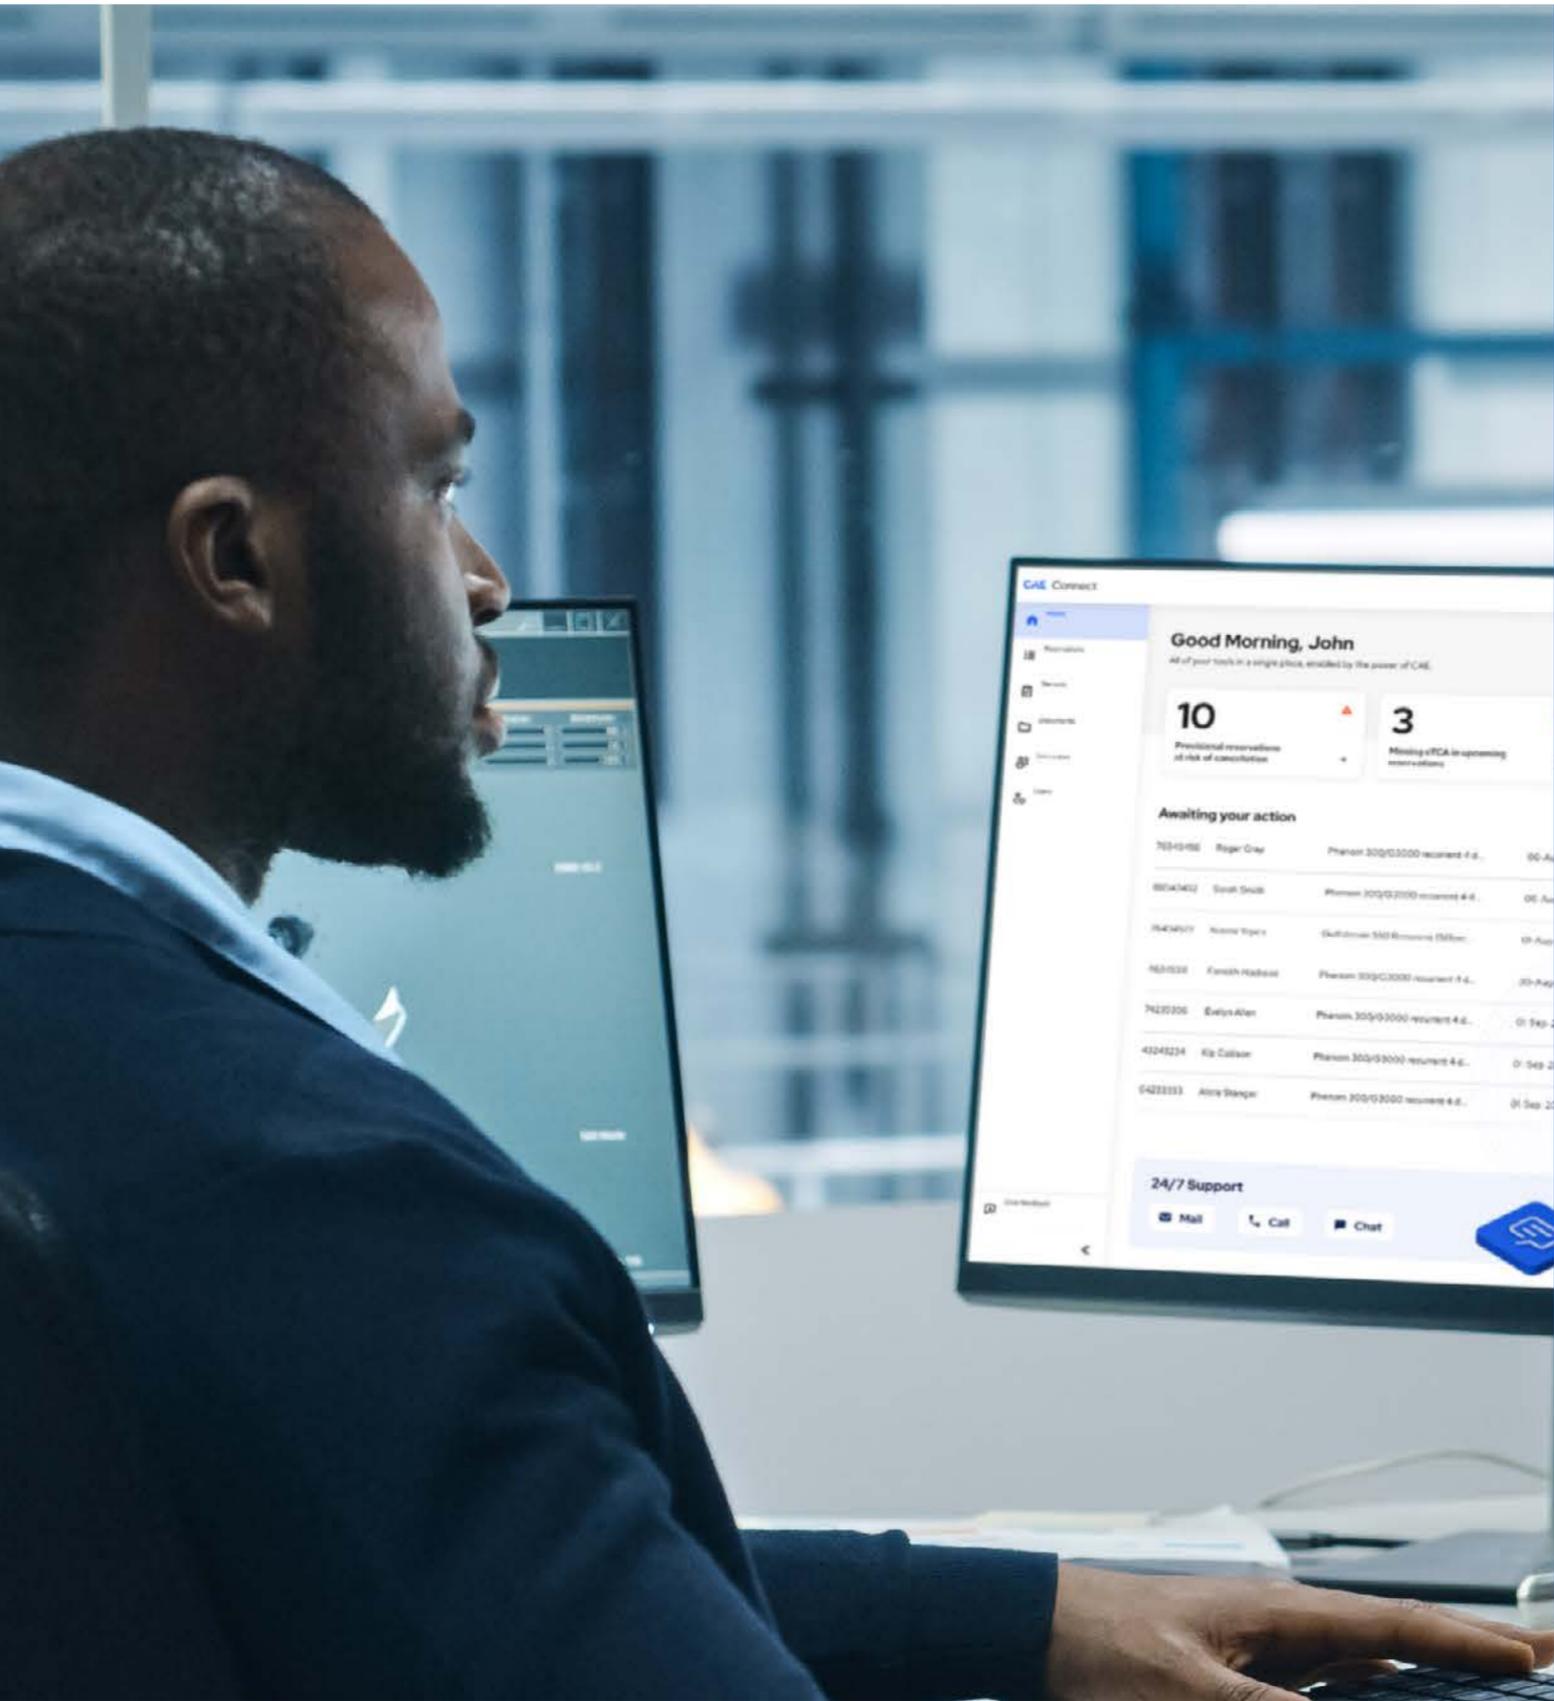

Exploring and introducing new digital training tools.

With **Apple Vision Pro**, CAE is exploring new immersive experiences that push training to unprecedented levels, enabling pilots to gain 'true-to-life' flight deck familiarity and confidence from anywhere.

CAE Virtual Reality Maintenance Training is similarly transforming aircraft technician training, beginning a new era of competency, adaptability, efficiency and safety in aviation maintenance.

Unifying, streamlining, and simplifying **crew training management.**

CAE Connect is a new all-in-one portal enabling business aviation operators to comprehensively manage crew training. With CAE Connect's seamless integration of timesaving features, operators can experience enhanced and efficient digital management of their core training needs.

CAE Crew Training App, recently refined, is an all-in-one aviation learning app, designed to enhance the training journey. It contains everything needed while training at CAE, including real-time notifications, pre-check-in, training and location details, schedules, documents, annotation tools, and more.

Self-Check-in is now available at CAE Training Centers, as a way to swiftly and securely begin the training experience through our newly deployed CAE Self-Check-in kiosks.

Extending reach,
**growing
accessibility**
to our training
worldwide.

Increasing our worldwide presence and team to rapidly expand training availability in new locations and aircraft platforms.

The world's largest civil aviation training network, meeting the needs of aviation more completely.

As leaders in aviation training, we're committed to ensuring our readiness to meet the needs of aviation in the future, while remaining focused on meeting your needs today. Currently, we're equally capable of delivering our high-value, high-quality training services beyond the realm of our actual facilities, from highly-immersive digital experiences, to more standard instructor-led remote sessions conducted at any customer's site. Such evolutionary steps in both how and where we train are an essential part of ensuring CAE keeps pace with aviation's rapidly accelerating needs, worldwide.
