Confidence through  
smarter training

# CAE Master Aircraft Technician Award Program

For organizations and individuals who seek to attain the highest standards of technical excellence and professionalism in aircraft maintenance, CAE proudly offers the Master Aircraft Technician Award. The CAE Master Aircraft Technician award program assures business aircraft operators that the recipient has successfully passed a series of rigorous courses designed to enhance and elevate the theoretical and practical skills of maintenance technicians. Pilots and passengers who fly on Master Aircraft Technician maintained aircraft can be confident of the highest levels of operational competency.

## CAE Master Technician: A Pathway to Excellence

Master Tech is an industry-recognized career development program that offers visible recognition of excellence. With three levels of achievement, you can reach Master Technician status in less time than in traditional career development programs. Our program offers flexible career paths tailored to you, with multiple pathways to becoming a Master Technician, including specialists or leadership positions.

At CAE, we believe that achieving excellence requires having a plan. That's why our program recognizes competency development, not just aircraft-specific training events. As a result, our graduates are equipped with greater expertise, which leads to reduced aircraft repair downtime and reduced quality escapes.

With personal and professional development all in one program, Master Tech is the perfect choice for those looking to advance their careers in the aviation industry.

Learn more about Master Tech today and start on the path to becoming a Master Technician. Whether you're looking to specialize in a particular area or take on a leadership role, Master Tech has the tools and resources you need to achieve your career goals.

## CAE Master Aircraft Technician Award Program

In keeping with CAE's recognition ever-changing demands placed on technicians, the Master Aircraft Technician Award program allows technicians to train on courses that add to their skillset and competency in both technical and leadership training. Technicians are now able to access a wide array of courses to advance their Master Tech journey all while training them on relevant skills needed to excel in the industry.

CAE Master Technicians are the best because they maintain their active status by attending our continued education training courses. Simply select and complete 30 hours of training choosing from any of the qualifying courses within a 24-month period after you receive your Master Aircraft Technician Award to keep your status current.

To start the Master Tech path first complete a Maintenance Initial training course and then one additional skill course to achieve the Certified Technician award. Current Certified Technicians that complete two additional skills building courses are eligible for the Advanced Technician award. Current Advanced Techs must complete a "Capstone" course to advance to the Master Technician status. The Capstone course for technicians wishing to advance their leadership skills is the Aviation Interpersonal Management course, where technicians wanting to become technical Subject Matter Experts will take an Advanced Troubleshooter course.

## Initial qualification training curriculum

- Maintenance Initial Training Courses
- Avionics Systems Training Courses
- REALcase Update
- Various Elective Curriculum Training Courses

## Continuation training curriculum examples
