

Emmanuel Levitte

Chief Technology Officer

Emmanuel Levitte is CAE's Chief Technology Officer. Emmanuel leads the global technology teams, shaping the company's strategic direction to maximize business growth while maintaining CAE's market leadership. He also drives alignment and integration of Global Technology and Products across CAE's Civil and Defense & Security divisions, ensuring a cohesive approach to product management and innovation.

Emmanuel is at the helm of CAE's technology function development, fostering synergy between the digital and engineering teams to deliver intelligent products, operations, and services at scale. As such, he is responsible for the growth of engineering, product management, IT, cybersecurity, and digital services to accelerate the development and safe adoption of game-changing innovations.

He champions forward-thinking approaches that align with CAE's corporate responsibility and sustainability initiatives across our organization, client base and supplier ecosystem.

Emmanuel's experience in aerospace spans over 20 years, taking off at Dassault Aviation and advancing through Bombardier before landing at CAE where he has held various leadership roles in Defense & Security, Engineering, and Global Procurement. He also previously diversified his skillset as at Amazon, where he managed product at scale.

Emmanuel's academic credentials include an MBA from HEC Montréal, a Master of Science in Mechanical Engineering from Sherbrooke University, and a Mechanical Engineering degree from the Arts et Métiers an engineering and research institute in Paris.
