

Turkish Airlines adopts CAE's next-generation Unified Task Board and Crew Management solutions

The game-changing Unified Task Board solution uses advanced technologies to provide data-driven scenarios for critical decision making and boost operational efficiency

Montreal, Canada, February 6, 2025 – (NYSE: CAE; TSX: CAE) – Today, CAE announced that Turkish Airlines has signed a long-term agreement to implement CAE's next-generation Crew Management product and the Unified Task Board – a new situational awareness and disruption management solution for airline operations control centres (OCCs). In addition to Crew Management and Unified Task Board, Turkish Airlines is a longstanding user of CAE's Flight Plan Management product.

Designed from the ground up and in close alignment with airline partners, the Unified Task Board provides situational awareness of the operation across the OCC. It optimizes disruption and recovery management by integrating data from multiple systems into a single view to support decision-making. The platform auto-calculates disruption scenarios for common and complex day-of-operations issues in real time and allows users to sort, filter, and evaluate solution trade-offs to identify the most beneficial resolution pathway.

"With the integration of CAE's Flight Plan Management, Crew Management and Unified Task Board solutions, Turkish Airlines is equipping its team to enhance operations and maximize overall performance," said Pascal Grenier, CAE's Division President of Flight Solutions." The Crew Management platform aims to boost crew productivity, optimize efficiency and resolve disruptions when time is of the essence. Additionally, the Unified Task Board will enable Turkish Airlines to efficiently manage operational disruptions by offering a comprehensive, real-time view of alerts, contextual details, and system-generated recovery scenarios in a single interface, enabling the Crew Management teams to take more informed decisions faster."

"We are committed to maintaining our competitive edge and delivering the high-quality travel experience our guests rely on with Turkish Airlines. To achieve this, we continuously seek innovative solutions to enhance our operations. Building on the success of CAE's Flight Management software, we are excited to move forward with the integration of the company's Crew Management software and Unified Task Board. We are confident these solutions will increase efficiencies, reduce disruptions for our guests, allow faster disruption recovery, and create an even better working environment for our crew," said Ahmet Acar, Senior Vice President of crew Planning at Turkish Airlines.

CAE's suite of Flight Operations Solutions includes Crew Management, Flight Management, Airport Management, In-Flight Services Management, Operations Control, Training Management and Unified Task Board. Using data from the suite of products, Unified Task Board enhances situational awareness and breaks down silos to enable users to work collaboratively and make proactive informed decisions. CAE's Flight Operations Solutions allow airlines to make faster decisions and push real-time changes. Each software package offers improved efficiencies through automated workflows and intuitive, user-friendly interfaces, seamlessly integrating with other service-oriented architecture.

About CAE

At CAE, we equip people in critical roles with the expertise and solutions to create a safer world. As a technology company, we digitalize the physical world, deploying software-based simulation training and critical operations support solutions. Above all else, we empower pilots, cabin crew, maintenance technicians, airlines, business aviation operators, and defence and security forces to perform at their best every day and when the stakes are the highest. Around the globe, we're everywhere customers need us to be with approximately 13,000 employees in more than 240 sites and training locations in over 40 countries. CAE represents more than 75 years of industry firsts—the highest-fidelity flight and mission simulators as well as training programs powered by digital technologies. We embed sustainability in everything we do. Today and tomorrow, we'll make sure our customers are ready for the moments that matter.
