

L3HARRIS AWARDED CONTRACT FOR GREECE F-16 UPGRADED TRAINERS

L3Harris Press Release

APR 23, 2020

ARLINGTON, Texas

Highlights:

- L3Harris to support new foreign military contract with Greece for F-16 Aircrew Training Devices
- Company will develop and build devices in Texas and install the technology in Greece
- L3Harris Training Systems enhance air-to-air and air-to-ground combat skills

L3Harris Technologies (NYSE: LHX) today announced that the company has signed a foreign military sales (FMS) contract for key upgrades to existing aviation technologies in service to the government of Greece.

The contract upgrades two existing Air Force F-16 Aircrew Training Devices to the Retrofit/Upgrade F-16V configuration. The new variant includes add-ons such as an electronically scanned array radar, a new mission computer and electronic warfare suite, an automated ground collision avoidance system and various cockpit improvements. These improvements will enable pilots to improve their air-to-air and air-to-ground combat skills. In addition, pilots using the L3Harris Training Systems can practice essential flight maneuvers such as takeoffs and landings, aerial in-flight refueling, low-level flight and emergency procedures.

“By providing upgraded F-16 Training Systems to this U.S. ally, L3Harris is helping the Hellenic Air Force improve pilot performance on their upgraded combat aircraft,” said Lenny Genna, President, L3Harris Military Training, Aviation Systems. “L3Harris is a global leader in aviation training with unique strengths in Training System technology for a variety of military and civilian aircraft, and we are honored to be able to support Greece by giving its pilots a critical performance edge.”

The development and build-up of the training devices and system will be conducted in Arlington, TX, and the installations of the upgrades will take place in the customer’s facilities in Greece. L3Harris will deliver and install the Training Systems at the Araxos Air Base and Souda Bay Air Base in Greece.

“Greece is dedicated to securing the most advanced defense technologies and strategies available today in service of protecting our country and our people,” said Nikos Panagiotopoulos, the National Defense Minister of Greece. “The L3Harris upgrade of the F-16 training technology, which plays a vital role in safeguarding Greece’s national sovereignty and defending its airspace from unauthorized intrusions, was a top priority in continuing our steadfast commitment to the safety of our citizens.”

L3Harris will be providing two years of on-site Contractor Logistics Support after the devices are delivered in-country.

About L3Harris Technologies

L3Harris Technologies is an agile global aerospace and defense technology innovator, delivering end-to-end solutions that meet customers’ mission-critical needs. The company provides advanced defense and

commercial technologies across air, land, sea, space and cyber domains. L3Harris has approximately \$18 billion in annual revenue and 50,000 employees, with customers in 130 countries. L3Harris.com.

Forward-Looking Statements

This press release contains forward-looking statements that reflect management's current expectations, assumptions and estimates of future performance and economic conditions. Such statements are made in reliance upon the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The company cautions investors that any forward-looking statements are subject to risks and uncertainties that may cause actual results and future trends to differ materially from those matters expressed in or implied by such forward-looking statements. Statements about system capabilities are forward-looking and involve risks and uncertainties. L3Harris disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.
