CAE Rise™ is a data-driven training system that leverages analytics, objectively assesses pilot performance in real-time and provides insightful training analytics.

**Key Benefits**

**Training the safest pilots**
- Uses objective data from CAE simulators to measure pilot performance
- Monitors and reports pilots SOP adherence in select procedural tasks

**Delivering higher quality of training**
- Standardizes evaluations
- Offloads instructors by allowing them to focus on assessing soft-skills and catching errors they might not be able to detect

**Building effective training programs**
- Insights identify strengths and weaknesses in pilot skills
- Data analytics - support the evolution of operator’s training programs

**CAE’s vision of the CAE Rise™ Training System**

CAE's vision with the CAE Rise™ training system is to be the foundation to a training management ecosystem, and an Integrated Safety Management System.
What is it?

• CAE Rise™ eGrading app
• Metrics-based insights
• Data analytics services

CAE Rise™ eGrading app

The CAE Rise™ eGrading app is an electronic tool that instructors use to access the digital training library as well as deliver and grade training.

• Ensures clients are receiving a standard training delivery
• Provides the foundation for collecting data, thus allowing analytic services to derive insight to enhance training performance
• Pushes training data directly to your Qualification Management System

Metrics-based insights

CAE Rise™ automatically detects and assesses predefined training events. Pilot performance insights are then made available to instructors in real-time to support assessments.

• Reduces instructor workload to allow increased focus on monitoring non-technical skills
• Provides objective measure to standardize instructor evaluations
• Empowers instructors to become adaptive teachers
• Highlights a pilot's specific area of development and allows the support of an individualised and efficient training experience
• Data-driven approach to better facilitate post-training debriefs

Data analytics services

CAE Rise™ Analytics provide training intelligence that enables effective data-driven decision-making to elevate training standards and effectively mitigate training deficiencies. Based on assessment of indicators and metrics, the insights allow to determine tailored training program needs.

• Training program analysis that help discover useful information, suggest conclusions and support enhanced decision-making.
• Helps in the creation of training programs adapted to individual and demographic needs
• Provides in-depth analysis of instructor evaluations
• Assists in predicting trends in trainee performance to govern success in course completion
