

A large commercial airplane is shown from a low angle, flying directly towards the viewer. The aircraft is white with blue accents on the tail and engines. It is positioned in the center of the frame, with its landing gear visible. The background features a dramatic sky with orange and blue clouds, suggesting a sunset or sunrise. Below the aircraft, a runway with white markings is visible, stretching into the distance.

CAE Technical Support Services

CAMO

CAE Parc Aviation is an EASA approved Continuing Airworthiness Management Organisation, focused on the provision of independent CAMO services for large commercial aircraft transitioning between lease operators.

Working with leasing companies, airlines and aviation authorities, we seamlessly manage airworthiness requirements and aircraft transitions to keep our clients' aircraft in compliance.

We hold EASA, BCAA, IOM, Guernsey 2-Reg, Jersey JAR and Cayman Island approvals.

Borescope

CAE Parc Aviation holds EASA Part 145 and FAA approvals to perform engine borescope inspections. Our highly experienced, regionally based teams can carry out inspections on a worldwide basis.

Using state of the art equipment, we provide a full video borescope with comprehensive reporting.

We are approved to issue EASA/FAA dual release certificates and carry out on-wing and off-wing inspections on a scheduled or an AOG basis globally.

EASA Approval: IE.145.072

FAA Approval: 7EPY673C

Part 21 Design

Our highly experienced design team have the capability to produce a full suite of multi-disciplined aircraft modifications (interiors, avionics, structures) from Minor to Major (STC). Modifications can be provided as EASA, FAA and UAE approved engineering packages on all commercial aircraft platforms.

We provide turnkey solutions for aircraft transition events and interior reconfigurations including full project and materials management on a global scale for leasing companies and airlines.

Aircraft Structural, Sheet Metal & Composite Repair Reviews

CAE Parc Aviation provide bespoke Aircraft Structures, Sheet Metal and Composite Repair Reviews with fully managed global support to Leasing Companies, Airlines, Financial Institutions and Operators. We specialise in:

- On-site structural/sheet metal/composite repair reviews
- On-site bare metal inspection during paint event
- On-site repair oversight support during delivery check
- On-site dent and buckle/repair file mapping
- Full DFP review of dent and buckle/repair file, creation of Open Item List

Customised to your operation

Engine Leasing Support Services

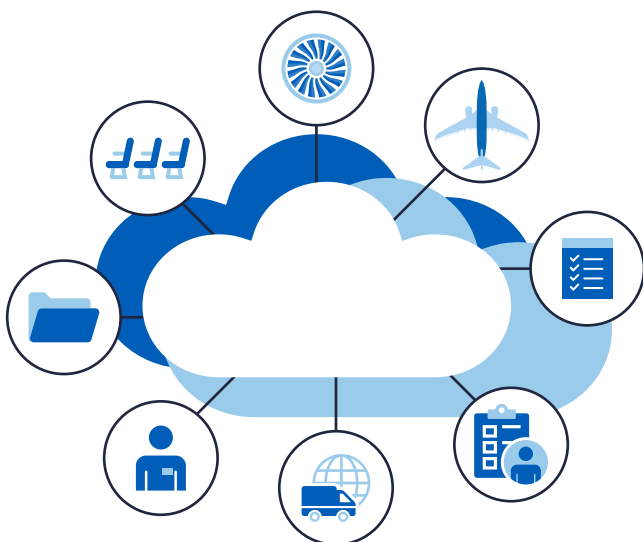

Our highly experienced engine support services department provide the engine support services to cover all aspects of our clients needs.

- Trend/Profile Reporting
- MPA Witness
- Engine Shop Visit Support
- Engine Removal On-site Support
- Engine/APU records review
- Engine Mid-lease Review
- Technical Help & Support

Remote Records Services

Our specialised remote records service delivers clients a cost effective, diligent review of their records and provides a detailed Open Item List using the newly developed digital platform in partnership with Cloudcards Aviation Software. This program has many benefits allowing for real-time review and closure of records discrepancies.

Our central records team have detailed experience in aircraft records and transition events, working across all aircraft and engine types.

Technical Consultants

With a global pool of highly experienced technical consultants, CAE Parc Aviation delivers the expertise and services required to cover all aspects of our clients' needs including:

- Pre-production Inspections
- Mid-term & Annual Audits
- Pre-purchase Inspections
- Lease Transition & Maintenance Events
- Engine Shop Visits
- Field Service & Entry Into Service Support
- Aircraft-Acceptance-Midlease
- Re-delivery/Delivery

Material Procurement & Logistics Support

Our expert teams based out of our Dublin and Shannon Offices can provide our clients with a highly professional service to meet the demands of your asset re-delivery / delivery.

Mid-Lease & Annual Audit Inspections

Our team is highly experienced in performing Mid-Lease & Annual Audit Inspections on aircraft or engine assets. With our large pool of talent, we can support our clients globally.

Our inspectors can perform physical inspections, records reviews with QC oversight and data upload to the clients' preferred operating system. They can also prepare or assist our clients with asset technical specifications for re-marketing.

Ferry Flight Solutions

Ferry flight solutions provided by our recommended ferry flight services company.
