Commercial Aircraft Maintenance Training

Confidence through
smarter training

Commercial Aircraft Maintenance Training

Proper aircraft maintenance is vital to ensure the safety of air travel and you can look to us for flexible, relevant, and leading-edge commercial aircraft maintenance training solutions to enhance safety, efficiency, and readiness for your fleet. Take advantage of our global network of training centers, highly skilled instructors, and advanced training tools to keep your technician's skillset current across a full suite of programs for OEMs such as Airbus, Boeing, Bombardier, and Embraer.

Training and technology

Our excellent training and technology have earned the confidence of airline operators, MROs and regulators. Over the years, several airlines and MROs have entrusted us with the development of their training programs. To ensure that we meet their specific needs and provide a training experience true to the aircraft, we work closely with each to develop and fine-tune training programs. Our broad range of aircraft technical training programs continues to expand within our network. And as we add to these and other partnerships, we will continue to offer outstanding training to an ever-increasing customer base.

Superior centers

Our dedicated maintenance training base locations boast fully integrated state-of-the-art multiscreen CAE Simfinity™ classrooms, training devices, technical publications research capability, and comfortable lounges. Each center delivers the same high level of instruction, service, courseware, and technology that distinguishes CAE as a global leader in aviation training and services. With a training network that strategically spans five continents, we make it easier and more convenient to train locally, keeping you closer to home.

We also understand that scheduling conflicts and travel costs can make it difficult to provide the training your technicians need. That's why CAE will bring the training to you. You tell us when and where and we'll bring the classroom to you with the same technology and training standards you'd expect from one of our centers for added flexibility and cost savings.

Why train with CAE

- Highest safety standards
- Tailored programs to meet your needs
- "Mobile" classrooms providing on-site cost-efficient training
- Modern conveniently located training center
- Unsurpassed attention and service
- Talented instructors with hands-on experience from the field
- Curriculum approved by regulatory authorities from around the world – FAA, EASA, CAAC, GCAA, DGCA, CAAM, UKCAA and TCCA

Note: Some courses may not be available on all models.

About CAE

At CAE, we equip people in critical roles with the expertise and solutions to create a safer world. As a technology company, we digitalize the physical world, deploying software-based simulation training and critical operations support solutions. Above all else, we empower pilots, cabin crew, airlines, and defence and security forces to perform at their best every day and when the stakes are the highest. Around the globe, we're everywhere customers need us to be with more than 13,000 employees in approximately 250 sites and training locations in over 40 countries. CAE represents more than 75 years of industry firsts—the highest-fidelity flight and mission simulators as well as training programs powered by digital technologies. We embed sustainability in everything we do.

Today and tomorrow, we'll make sure our customers are ready for the moments that matter.
