AVIATION DIGITAL SOLUTIONS

Flight Operations Solutions

Delivering customer experience through a broad solution set

The Flight Operations Solutions suite helps operators breakdown operational silos and harness the power of data to improve performance, profitability and passenger experience. Operations Control, Crew, Flight, Airport, In-Flight, Training and Crew Engagement solutions provide operators with an end-to-end solution that uses the power of data to improve decision making.

Key benefits

• Unified: A comprehensive operational overview at all times to break operational silos.
• Intelligent: Automated decisions with operation-wide considerations to unlock new efficiency.
• Agile: Gives operators control to achieve their unique strategies and accelerate growth.

CAE

Flight Operations Solutions

The Flight Operations Solutions suite manages extreme complexity and comes together as the industry's only platform offering end-to-end operations management. Across Training Management, Operations Control, Crew Management, Flight Management, In-Flight Services Management and Airport Management, the Flight Operations Solutions suite enables operators to deliver on their brand promise, reduce operating costs and increase employee satisfaction.

Training Management	Operations Control	Crew Management	Flight Management	In-Flight Services Management	Airport Management
Training management, courseware, analytics	Flight display and operations control	Planning, monitoring, self service, crew access	Flight planning, dispatch, tracking	Automation, planning for onboard catering	Planning, utilization for gate assignments and staffing

Cloud enablement | Open, flexible architecture | Stability and security

Training Management

Training Management harnesses the power of data to elevate safety, readiness and efficiency. Customers benefit from added training intelligence to elevate training standards and mitigate training deficiencies. Operators also gain access to course development teams, a complete training management system, an extensive courseware library and unparalleled service.

Operations Control

Operations Control enables operators to gain a competitive advantage by making optimal use of aircraft and executing the best operational plan to meet commercial objectives by tapping into innovative solutions.

Crew Management

Crew Management is a revolutionary solution designed around the principle of configuration. Customers can make changes to workflows without the need for solution development or customization, including search, filter templates, reports, rules and user interface preferences.

Flight Management

Flight Management solutions combine the core functions of flight operations to deliver the industry's lowest cost flight plans along with increased productivity. By establishing a shared operational picture, airlines can achieve maximum savings.

In-Flight Services Management

In-Flight Services management is an end-to-end, caterer-neutral product. As a comprehensive solution, it spans all aspects of service planning, meal ordering, forecasting, operations, materials management, financial controls and reporting.

Airport Management

Airport Management is a suite of solutions that provides flexible resource management and optimization tools that can increase operational efficiency, decrease costs and improve the customer experience. Along the way, it can boost employee satisfaction as well.

Trusted by operators globally

Today, the Flight Operations Solutions suite is trusted by operators across the entire globe. The platform has proven scalability and is backed by superior performance across the community. The platform successfully…

tracks over 54 million flights per year

generates more than 8 million flight plans every year

supports over 200,000 crew members worldwide

Now is not the time to sit still however, and CAE continues to foster ongoing innovation through collaboration with CAE Labs, our research and innovation team, and joint ventures with customers. Our regular user workshops help bring together and strengthen the growing community of users, collecting new ideas and solving challenges. CAE continues to look towards supporting each customer's unique challenges as the industry evolves and grows over the coming decades.
