AVIATION DIGITAL SOLUTIONS

Training Management

Maximize your training

Training Management harnesses the power of data to elevate safety, readiness, and efficiency. Customers benefit from added training intelligence to elevate training standards and mitigate training deficiencies. Operators also gain access to course development teams, a complete training management system, an extensive courseware library and unparalleled service.

Key benefits

- Complete training management system and extensive courseware library
- Objective data from CAE Simulators to measure pilot performance and train the safest pilots
- Offloads instructors by allowing them to focus on assessing soft-skills and catching errors they might not be able to detect
- Data analytics support the evolution of operators' training programs

CAE

Training Management

Manage and deploy your aviation training through one solution

Our Training Management and Deployment System (TMDS) is the most comprehensive aviation training and compliance management solution in the industry. It is scalable and flexible to fit the needs of your airline and training operation. Desktop and mobile, online and offline, our system can be configured according to your organization's requirements and needs.
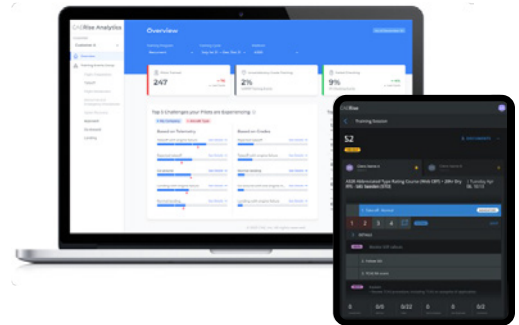

- **Learning Management System (LMS):** manage, launch and track eLearning content and exams
- **CrewPad Mobile Solutions:** deploy online / offline training on IOS, Android, Windows
- **Exam Generation System (EGS):** design and manage technical questions, exams and assessments
- **Scheduling System:** streamline scheduling processes and track instructors, students and resources
- **Electronic Training Records System (ETR):** collect training and assessment data offline for EBT/ATQP/AQP
- **Qualification Management System (QMS):** manage complex crew qualifications

Deliver higher quality of training insights with CAE Rise™

CAE Rise™ is a data-driven training system that leverages analytics to make pilot training more effective and provide the safest operational environments. CAE's vision with the Rise'» training system is to be the foundation to a training management ecosystem, and an Integrated Safety Management System.

- CAE Rise™ automatically detects and assesses predefined training events. Pilot performance insights are then made available to instructors in real-time to support assessments.
- The CAE Rise™ eGrading app is an electronic tool that instructors use to access the digital training library as well as deliver and grade training.
- CAE Rise™ Analytics provide training intelligence that enables effective data-driven decision making to elevate training standards and effectively mitigate training deficiencies. Based on assessment of indicators and metrics, the insights allow to determine tailored training program needs.
