<td>CAE trains aspiring pilots through a network of flight schools located in multiple global locations, all over the world. A range of training programs are available including Commercial Pilot License (CPL), Airline Transport Pilot License (ATPL), and airline-mentored Multi-Crew Pilot License (MPL), all of which combine premier ground school courses with high quality flying instruction. Every year, one thousand new pilots graduate from CAE. As the leader in the development of airline-mentored competency based cadet training programs, CAE has managed the entire recruitment and training process of new pilots for your airline. CAE will identify and train cadets, and deliver highly trained and competent first officers to your airline’s specific pilot profile. CAE operates the world’s largest civil aviation training network. With more than 50 training locations across six continents, we train over 120,000 pilots globally each year. CAE provides type specific training programs for airline pilots on the widest coverage of in-production and in-service aircraft models in the industry. Through innovative methodologies, advanced technology, simulation based training tools, and best-in-class instructors, the CAE training experience provides commercial aircraft pilots with the highest quality, operationally oriented training. CAE addresses the cyclical staffing needs of airlines by matching the best available personnel with the world’s leading airlines. Our aviation recruitment services support airlines during phases of fleet expansion or in seasonal peak demands and include the sourcing, contracting and recruitment of pilots. Depending on the capacity needs of your airline, we can provide experienced First Officers, Captains and Instructors, on-lease or on a permanent basis. CAE currently has more than 1,000 pilots on assignment with over 50 airlines across the world.</td>
