CAE Brunei Multi-Purpose Training Centre plans to become Approved Training Organization

- Turnkey “wet” training program for S-92 helicopter to be added to existing S-92 training program –

Montreal, Canada, August 31, 2015 – (NYSE: CAE; TSX: CAE) – The CAE Brunei Multi-Purpose Training Centre (MPTC), a joint venture of CAE and the Ministry of Finance of Brunei Darussalam, today announced that it plans to become an Approved Training Organization (ATO) according to the guidelines and procedures established by the European Aviation Safety Agency (EASA).

The CAE Brunei MPTC will be adding a turnkey instructor-led (“wet”) initial and recurrent training solution for the Sikorsky S-92 helicopter later this year. The S-92 “wet” training solution will include advanced classroom and simulator training delivered by qualified CAE Brunei MPTC instructors. The CAE Brunei MPTC currently offers operator-led “dry” training on a CAE 3000 Series S-92 full-flight simulator (FFS), which was certified by EASA to Level D, the highest qualification for flight simulators, and entered service in 2014 at the CAE Brunei MPTC.

“The CAE Brunei MPTC continues to make significant progress, and becoming an Approved Training Organization is yet another milestone in the development of a world-class training facility,” said Kevin Speed, General Manager, CAE Brunei MPTC. “Being able to offer our offshore oil and gas customers flying the S-92 helicopter either wet or dry training is consistent with our commitment to supporting safe operations and crew readiness in all our training programs.”

Current customers conducting S-92 helicopter training at the CAE Brunei MPTC include Brunei Shell Petroleum, CHC Helicopter Australia, Bristow Helicopters and China Southern Airlines Zhuhai Helicopter Branch.

“Having the S-92 simulator in Brunei allows us easy access to the training facility anytime of the year without having to travel to simulator locations normally reserved for us in the United States or Europe,” said Alexirwan Omar, Head of Aircraft Services at Brunei Shell Petroleum Co Sdn Bhd. “The quality of training is enhanced and that brings huge benefits in terms of safety in our flight operations department.”

In addition to S-92 helicopter training, the CAE Brunei MPTC offers a comprehensive training program for the Pilatus PC-7 training aircraft, including a CAE-built PC-7 flight training device. In 2016, the CAE Brunei MPTC will take delivery of a CAE 3000 Series S-70i Black Hawk helicopter simulator and begin offering a comprehensive training program for the Sikorsky S-70i Black Hawk.

The CAE Brunei MPTC has also established an Emergency and Crisis Management Centre of Excellence that will provide relevant local authorities with comprehensive training designed to better plan and prepare for emergencies. Using simulation-based training, the CAE Brunei MPTC will offer emergency and crisis management training programs that will help improve coordination,

response and operational decision-making during a range of emergency scenarios. The CAE Brunei MPTC will also be offering emergency and crisis management training to the Association of Southeast Asia Nations (ASEAN).

About the CAE Brunei Multi-Purpose Training Centre (MPTC)

The CAE Brunei Multi-Purpose Training Centre (MPTC) in Brunei Darussalam was established in 2012 as a joint venture between CAE and the Government of Brunei. The development of the integrated training facility for the CAE Brunei MPTC was completed in 2014 and the facility officially started training in September 2014. The CAE Brunei MPTC, located in Rimba, Brunei, near the Brunei International Airport, is a world-class training facility that is staffed and operated by Bruneians. The CAE Brunei MPTC plays a key role in further developing the defence, aviation and emergency/crisis management market segments in Brunei.

About CAE

CAE is a global leader in the delivery of training for the civil aviation, defence and security, and healthcare markets. We design and integrate the industry's most comprehensive training solutions, anchored by the knowledge and expertise of our 8,000 employees, our world-leading simulation technologies and a track record of service and technology innovation spanning seven decades. Our global presence is the broadest in the industry, with 160 sites and training locations in 35 countries, including our joint venture operations, and the world's largest installed base of flight simulators. Each year, we train more than 120,000 civil and defence crewmembers, as well as thousands of healthcare professionals. www.cae.com
