CAE Healthcare releases LearningSpace Intuity, a fully redesigned solution for simulation center management

San Diego, California, USA , January 15, 2016 – On the eve of the International Meeting on Simulation in Healthcare (IMSH) in San Diego, USA, CAE Healthcare announced the release of LearningSpace Intuity™, the next generation of its comprehensive audiovisual solution for simulation center management. The fully redesigned solution offers a more intuitive user experience, greater ease of use, and expanded flexibility for mobile platforms.

“We designed LearningSpace Intuity to meet the expectations of healthcare simulation faculty and facilitators who need to learn quickly and independently, are eager to integrate mobile devices into medical simulation, and who desire more flexibility to analyze captured data so they can improve the efficiency and effectiveness of their simulation centers,” said Dr. Robert Amyot, President of CAE Healthcare.

Intuity provides ease of navigation, time efficiency and an enriched end user experience for healthcare faculty, simulation center managers and students. Based on extensive research and customer feedback, the LearningSpace engineering team spent more than a year developing key software advancements and ensuring Intuity would meet the needs of customers today and in the future.

The new simplified hardware platform captures audio, video, and patient data into a one box per room configuration. The one box platform is uniform for all customers and can be scaled to multiple rooms or locations with the addition of a connecting server.

CAE Healthcare’s audiovisual solutions, LearningSpace and Replay, comprise one of the fastest-growing segments in its product portfolio. Developed in 2002 for Standardized Patient programs, LearningSpace has since grown to become an essential tool for the management of busy simulation centers, with more than 500 installations in 27 countries. In 2014, CAE Healthcare released Replay, a streamlined solution for recording and debrief. In 2015, LearningSpace successfully integrated with the MedAffinity electronic health record platform for education. With the release of Intuity, CAE Healthcare has reengineered the user experience to meet both consumer expectations and the future needs of simulation centers.

CAE Healthcare will showcase LearningSpace Intuity in Booth 608 at the International Meeting for Simulation in Healthcare (IMSH) in San Diego from January 16-20, 2016 and at the Human Patient Simulation Network (HPSN) World conference in Tampa, Florida from February 16-18, 2016.

About CAE Healthcare

[CAE Healthcare](#) offers cutting-edge learning tools to healthcare students and professionals, allowing them to develop practical experience through risk-free simulation training before treating real patients. CAE Healthcare's full spectrum of simulation solutions includes surgical and imaging simulation, curriculum, the LearningSpace audiovisual and center management platform and highly realistic adult, pediatric and baby patient simulators. Today, approximately 9,000 CAE Healthcare simulators and audiovisual solutions are in use worldwide by medical schools, nursing schools, hospitals, defence forces and other entities.

About CAE

[CAE](#) (NYSE: CAE; TSX: CAE) is a global leader in the delivery of training for the civil aviation, defence and security, and healthcare markets. We design and integrate the industry's most comprehensive training solutions, anchored by the knowledge and expertise of our 8,000 employees, our world-leading simulation technologies and a track record of service and technology innovation spanning seven decades. Our global presence is the broadest in the industry, with 160 sites and training locations in 35 countries, including our joint venture operations, and the world's largest installed base of flight simulators. Each year, we train more than 120,000 civil and defence crewmembers, as well as thousands of healthcare professionals.
