CAE announces that five new business and helicopter aviation programs are, or will soon be, ready for training in the Middle East, North America, Asia, and Europe

Geneva, Switzerland, May 19, 2015 – (NYSE: CAE; TSX: CAE) – CAE today announced at the European Business Aviation Convention and Exhibition (EBACE) that five new business and helicopter aviation training programs are, or will soon be, ready for training in the United Arab Emirates (UAE), the United States, China and Norway. The training programs are for the following aircraft types:

- Bombardier Global 5000 and Global 6000 business jets equipped with Global Vision avionics suite in Dubai, UAE
- Gulfstream G650 business jet in Dubai, UAE
- Dassault Falcon 900 and 2000EASy series business jets in Dallas, USA
- Sikorsky S92 helicopter in Zhuhai, China
- Eurocopter EC225 helicopter in Oslo, Norway

The training programs were previously announced for deployment, except for the Dassault Falcon 900 and 2000EASy in Dallas.

“We are proud to continue to provide our customers with high-fidelity training programs close to their home base,” said Nick Leontidis, CAE’s Group President, Civil Aviation Training Solutions. “We are seeing an increased demand for business aviation and helicopter training in the Americas, the Middle East, Europe and Asia.”

Training for Bombardier Global 5000 and Global 6000 business jets equipped with Vision flight deck in Dubai

A new Level-D full-flight simulator (FFS) for Bombardier Global 5000 and Global 6000 business jets equipped with the Bombardier Vision flight deck became ready for training earlier this year at Emirates-CAE Flight Training (ECFT) in Dubai. CAE also offers training for the Global 5000/6000 featuring the Bombardier Vision flight deck in Amsterdam.

Training for Gulfstream G650 business jet in Dubai

Emirates-CAE Flight Training’s Gulfstream G650 simulator will be ready for training in Dubai in the first half of 2016. The FFS is a newly-built CAE 7000 XR Series model equipped with the latest CAE Tropos-6000 XR visual system – it is CAE’s first 7000XR Series model of simulators for business jets. The 7000XR Series is CAE’s latest generation simulator designed to address new and future training requirements including enhanced instructor station that embrace Upset Prevention and Recovery Training capabilities. The Gulfstream G650 training program complements the network of Gulfstream G450/G550 large cabin training program currently available in CAE’s Dallas, New York, London, Dubai and Shanghai training centres.

Training for Dassault Falcon 900 and 2000 EASy series jets in Dallas, USA

In support to the market demand in North America for the Dassault Falcon 900 and 2000 EASy series, the new CAE-built FFS will be qualified to level-D and ready for training in the fall of 2015. Currently, CAE offers training for the Falcon 900 and 2000EASy series in its New York, London and Dubai training locations.

Training for Sikorsky S92 helicopter in Zhuhai, China

In support to the growing helicopter market in Asia, CAE and China Southern are offering a Sikorsky S92 helicopter training program in their Zhuhai Flight Training Center. The new FFS has been qualified to Level D in March 2015 and is now available for training.

This follows a Sikorsky S92 helicopter training program deployed in CAE's Oslo, Norway, training centre last summer. The program is currently available for a variety of mission-specific training but is targeted principally at the Offshore and Search and Rescue (SAR) markets.

CAE also offers Sikorsky S92 training in Sao Paulo, Brazil, and Rimba, Brunei.

Training for Airbus Helicopters H225 in Oslo, Norway

CAE's first Airbus Helicopters H225 full-flight simulator will be qualified to the highest fidelity (Level D) and is scheduled to be ready for training in mid-2015 at the CAE Oslo training centre. The H225 program will offer initial, recurrent, and mission-specific training for the Offshore, Search and Rescue (SAR), VIP and other operating profiles. The H225 training program will provide an unprecedented level of realism for pilot mission training. The CAE 3000 Series simulator, which was developed specifically for the helicopter market, will be equipped with a CAE Tropos-6000 visual system and Airbus Helicopters' original simulation package.

About CAE

CAE is a global leader in delivery of training for the civil aviation, defence and security, and healthcare markets. We design and integrate the industry's most comprehensive training solutions, anchored by the knowledge and expertise of our 8,000 employees, our world-leading simulation technologies and a track record of service and technology innovation spanning seven decades. Our global presence is the broadest in the industry, with 160 sites and training locations in 35 countries, including our joint venture operations, and the world's largest installed base of flight simulators. Each year, we train more than 120,000 civil and defence crewmembers, as well as thousands of healthcare professionals. www.cae.com
