

Trade Press Release

CAE to deploy an ATR full-flight simulator in India this year

Montreal, Canada, March 14, 2012 – (NYSE: CAE; TSX: CAE) – CAE today announced at the India Aviation Exhibition and Conference in Hyderabad that it will install an ATR 42 /ATR 72 full-flight simulator (FFS) at its commercial aviation training centre in Bengaluru, India. The FFS will be ready for training in the summer of 2012.

"This new ATR training capability further extends CAE's broad and deep commitment to the aviation community in India and the region," said Jeff Roberts, CAE's Group President, Civil Simulation Products, Training and Services. "Positioning this resource close to our ATR customers' base of operations will enable them to be more efficient while continuing to train the pilot skills and decision-making that enhances safety and effectiveness."

CAE will relocate the ATR 42/72 FFS from its training centre in Brussels, Belgium. The FFS is modeled for the ATR72-500 and ATR42-300 configurations.

The CAE training centre in Bengaluru is the first independent training centre to earn approval as a fixed-wing Type Rating Training Organization (TRTO) by India's Directorate General of Civil Aviation (DGCA). The centre also offers instructor-led "wet" and "dry" training for the Airbus A320 series and Boeing 737 aircraft.

About CAE

CAE is a global leader in modelling, simulation and training for civil aviation and defence. The company employs more than 7,500 people at more than 100 sites and training locations in more than 25 countries. Through CAE's global network of 34 civil aviation, military and helicopter training centres, the company trains more than 80,000 crewmembers yearly. CAE's business is diversified, ranging from the sale of simulation products to providing comprehensive services such as training and aviation services, professional services and in-service support. The company applies its simulation expertise and operational experience to help customers enhance safety, improve efficiency, maintain readiness and solve challenging problems. CAE is now leveraging its simulation capabilities in new markets such as healthcare and mining. www.cae.com
