Embraer-CAE Training Services to launch Phenom 100 and 300 jet training in Amsterdam

Geneva, Switzerland, May 24, 2016 (NYSE: CAE; TSX: CAE) – Embraer-CAE Training Services (ECTS), a joint venture between Embraer and CAE, announced today at the 2016 European Business Aviation Convention & Exhibition (EBACE) that it will further expand its training programs for Embraer Phenom 100 and Phenom 300 pilots and maintenance technicians through the addition of a new location at CAE's training centre in Amsterdam.

The training program will feature a CAE-built full-flight simulator (FFS), equipped with a Garmin Prodigy-Touch avionics system, and is expected to be ready for training in the first quarter of 2018.

"This addition to our services network reflects the growing number of operators in Europe and our commitment to delivering world-class training to our customers close to home," said Marco Tulio Pellegrini, President & CEO Embraer Executive Jets. "Our training program is based on a highly personalized level of service and Amsterdam is a convenient city that will provide our European Phenom jets operators the customer experience that is the cornerstone of our program."

The suitability of the Phenom jets fulfills all of business aviation's requirements, such as fractional ownership, charter, owner-pilot, corporate use, pilot training or employee shuttle. As of today, a fleet of more than 650 Phenom jets is currently in operation worldwide. Since 2010, the Phenom 300 has also accumulated the most deliveries in its class and for the past three years has been the most delivered business jet in the world.

"We are delighted to expand our relationship with Embraer and leverage CAE's worldwide training footprint," said Nick Leontidis, Group President, Civil Aviation Training Solutions. "The launch of this additional Phenom 100 and 300 jet training program is a testament to CAE and Embraer's true partnership approach."

The new ECTS training in Amsterdam complements existing training locations in Dallas, Texas in the United States, and São Paulo in Brazil.

About Embraer Executive Jets

Embraer is one of the world's leading executive jet manufacturers, having entered the business aviation market in 2000 with the Legacy jet, which led to the launch of Embraer Executive Jets in 2005. Its portfolio, the broadest in the market, consists of the entry-level Phenom 100E and the light Phenom 300 jet, the midsize Legacy 500 and mid-light Legacy 450, the super-midsize Legacy 600 and large Legacy 650 and the ultra-large Lineage 1000E. Embraer Executive Jets' global fleet exceeds 1,000 aircraft, which are in operation in more than 60 countries and are supported by the Company's global Customer Support and Services network of 75 owned and authorized service centers, complemented by a 24/7 Contact Center, at its headquarters in Brazil.

About CAE

CAE is a global leader in the delivery of training for the civil aviation, defence and security, and healthcare markets. We design and integrate the industry's most comprehensive training solutions, anchored by the knowledge and expertise of our 8,000 employees, our world-leading simulation technologies and a track record of service and technology innovation spanning seven decades. Our global presence is the broadest in the industry, with 160 sites and training locations in 35 countries, including our joint venture

operations, and the world's largest installed base of flight simulators. Each year, we train more than 120,000 civil and defence crewmembers, as well as thousands of healthcare professionals. www.cae.com
