## Royal College of Physicians and Surgeons of Canada accredits the **Université de Montréal simulation centre managed by CAE Healthcare**

**Montreal, Canada, January 30, 2012 – (NYSE: CAE; TSX: CAE)** – CAE Healthcare today announced that the Royal College of Physicians and Surgeons of Canada has accredited the simulation centre it manages at the Faculty of Medicine of Université de Montréal. The accreditation means that the Royal College recognizes that the centre effectively improves the quality of the educational experience offered to its students and meets the accreditation standards.

“We are pleased to have achieved this prestigious accreditation from the Royal College of Physicians and Surgeons of Canada,” said Michael Bernstein, President of CAE Healthcare. “The accreditation will enable us to develop and deliver new simulation training solutions and continuing education to physicians of today and the future. Through simulation healthcare professionals can practice certain procedures or operations in a safe environment which ultimately results in reduced risks to patients.”

The Centre d'apprentissage des attitudes et habiletés cliniques (CAAHC) is one of the largest healthcare simulation centres in Canada. Founded in partnership with the Faculty of Medicine of Université de Montréal and CAE Healthcare in February of 2009, the centre offers training to more than 1,000 medical students each month. The CAAHC is also a joint research and development site, where CAE Healthcare and the medical faculty develop and test new educational tools for healthcare. “The Université de Montréal's Faculty of Medicine is proud of the work done at the CAAHC simulation centre. This is a privileged place of learning and it allows our students to be better prepared and to offer better care to patients,” said Dr. Hélène Boisjoly, dean of Medicine at Université de Montréal.

The Royal College of Physicians and Surgeons of Canada is a highly respected national, non-profit organization dedicated to maintaining the highest standards in specialty medical education and professional practice. By participating in the accreditation process for the Université de Montréal medical simulation centre, CAE Healthcare has demonstrated that its mission, goals, infrastructures, policies and practices meet established educational and ethical standards for healthcare.

### **About CAE Healthcare**

CAE Healthcare offers cutting-edge learning tools to healthcare students and professionals, allowing them to develop practical experience through risk-free simulation training before treating real patients. CAE Healthcare's full spectrum of simulation solutions includes surgical and imaging simulation, curriculum, centre management and highly realistic adult, pediatric and baby patient simulators. Today, approximately 7,000 CAE Healthcare simulators are in use worldwide by medical schools, nursing schools, hospitals, defense forces and other entities. ### **About CAE**

CAE is a global leader in modelling, simulation and training for civil aviation and defence. The company employs more than 7,500 people at more than 100 sites and training locations in more than 20 countries. Through CAE's global network of 34 civil aviation, military and helicopter training centres, the company trains more than 80,000 crewmembers yearly. CAE's business is diversified, ranging from the sale of simulation products to providing comprehensive services such as training and aviation services, professional services and in-service support. The company aims to apply its simulation expertise and operational experience to help customers enhance safety, improve efficiency, maintain readiness and solve challenging problems. CAE is now leveraging its simulation capabilities in new markets such as healthcare and mining. [www.cae.com](http://www.cae.com)
