

## CAE expands instructor-led online courses for maintenance training to business jet platforms

**Montreal, Canada, August 25, 2020** (NYSE: CAE; TSX: CAE) – CAE announced today the expansion of its live online instructor-led maintenance training program, now available for Bombardier, Dassault, Gulfstream aircraft types and specific helicopter programs. The courses offer real-time teaching in a virtual classroom setting where trainees can interact with a course instructor and peers.

“We are thrilled to expand our virtual classrooms to support business jet operators at a time when it is needed most. Maintenance technicians are now able to take advantage of high-quality instructor-led training online, keeping them healthy and their operations flying safely,” said Nick Leontidis, CAE’s Group President, Civil Aviation Training Solutions. “Throughout the pandemic, we have strived to find new ways of delivering essential training, and this forward-thinking approach is a prime example of how we are supporting our customers during unprecedented times.”

Introduced for helicopter platforms in 2016, CAE now offers online instructor-led maintenance training courses to more than 15 operators and 200 individuals. Maintenance technicians can study anytime and anywhere with internet connection.

“Flexible schedules and online training solutions especially at a time when we need it the most are ideal and beneficial for our maintenance technicians,” said Brad Meineke, Engineering Manager P.T. Hevilift Aviation Indonesia. “CAE’s virtual instructor-led comprehensive courses offer the latest curriculum by ensuring safety for our maintenance technicians”.

“CAE’s online courses have allowed CHC the ability to maintain compliance to our regulatory and scheduling requirements for maintenance training despite the travel restrictions during these unprecedented times,” said Fiona Lowndes, Global Engineer Training Manager, CHC Helicopter. “This online instructor-led training program allows individuals country wide to attend a single session, enables team engagement and is particularly beneficial for the team at CHC considering Australia’s size and our remote bases of operation”.

CAE’s online instructor-led courses are designed to offer maximum flexibility for maintenance training, including interactive demonstrations, and courseware compliance to all regulatory and scheduling guidelines. The Webex-based platform gives the unique opportunity for maintenance technicians to arrange their learning process according to their needs and is regularly refreshed with up to date content.

### **About CAE**

CAE is a high technology company, at the leading edge of digital immersion, providing solutions to make the world a safer place. Backed by a record of more than 70 years of industry firsts, we continue to reimagine the customer experience and revolutionize training and operational support solutions in civil aviation, defence and security, and healthcare. We are the partner of choice to customers

worldwide who operate in complex, high-stakes and largely regulated environments, where successful outcomes are critical. Testament to our customers' ongoing needs for our solutions, over 60 percent of CAE's revenue is recurring in nature. We have the broadest global presence in our industry, with approximately 10,000 employees, 160 sites and training locations in over 35 countries. [www.cae.com](http://www.cae.com)
