

Thai Aviation Services begins S-92 helicopter training at CAE Brunei MPTC

Brunei Darussalam, March 8, 2018 – (NYSE: CAE; TSX: CAE) – The CAE Brunei Multi-Purpose Training Centre (MPTC), a joint venture of CAE and the Ministry of Finance of Brunei Darussalam, today announced that Thai Aviation Services has begun Sikorsky S-92 helicopter simulator training at the CAE Brunei MPTC.

Under a multi-year contract, Thai Aviation Services S-92 helicopter aircrews have started conducting their S-92 simulator training at the MPTC. Based in Bangkok, Thai Aviation Services operates a fleet of S-92 helicopters used primarily for offshore oil and gas operations in the Gulf of Thailand.

“We chose the CAE Brunei MPTC for our S-92 training because the simulator provides the needed realism for our helicopter-specific offshore oil and gas mission profile,” said Captain Nattapat Pongsatitvittaya, Chief Pilot, Thai Aviation Services. “We also considered the added value to conduct search and rescue (SAR) mission training for potential future SAR operations at Thai Aviation Services.”

The CAE 3000 Series S-92 helicopter mission simulator at the CAE Brunei MPTC features unprecedented realism for helicopter-specific mission training, including offshore oil and gas, search and rescue, and other types of operations. The simulator enables pilots to practice -- without risk -- challenging procedures such as low-level flight, confined area operations, autorotation and landing on platforms at sea. The CAE 3000 Series S-92 simulator features core CAE simulation technologies including the CAE True six Degree-of-Freedom (DOF) electric motion system and high-performance vibration platform to replicate vibration cues critical to helicopter pilots; a high-fidelity CAE Medallion-6000 image generator; and a direct projection 210 degree by 80 degree extreme field-of-view dome display system.

“We are pleased to welcome Thai Aviation Services to the list of customers training at the CAE Brunei Multi-Purpose Training Centre,” said Rozman Junaidi, General Manager, CAE Brunei MPTC. “Simulation-based training increases safety and efficiency while providing maximum training value to enhance crew readiness.”

In addition to S-92 helicopter training, the CAE Brunei MPTC offers comprehensive training programs for the Pilatus PC-7 training aircraft and S-70i Black Hawk helicopter, which is operated by the Royal Brunei Air Force. The CAE Brunei MPTC has also established an Emergency and Crisis Management Centre of Excellence that is now providing relevant local authorities with comprehensive training designed to better plan and prepare for emergencies. Using simulation-based training, the CAE Brunei MPTC offers emergency and crisis management training programs that

will help improve coordination, response and operational decision-making during a range of emergency scenarios.

About the CAE Brunei Multi-Purpose Training Centre (MPTC)

The CAE Brunei Multi-Purpose Training Centre (MPTC) in Brunei Darussalam was established in 2012 as a joint venture between CAE and the Government of Brunei. The development of the integrated training facility for the CAE Brunei MPTC was completed in 2014 and the facility officially started training in September 2014. The CAE Brunei MPTC, located in Rimba, Brunei, near the Brunei International Airport, is a world-class training facility that is staffed and operated by Bruneians. The CAE Brunei MPTC plays a key role in further developing the defence, aviation and emergency/crisis management market segments in Brunei.

About CAE

CAE's Defence & Security business unit focuses on helping prepare our customers to develop and maintain the highest levels of mission readiness. We are a world-class training systems integrator offering a comprehensive portfolio of training centres, training services and simulation products across the air, land, sea and public safety market segments. We serve our global defence and security customers through regional operations in Canada; the United States/Latin America; Europe/Africa; and Asia-Pacific/Middle East, all of which leverage the full breadth of CAE's capabilities, technologies and solutions.

CAE is a global leader in training for the civil aviation, defence and security, and healthcare markets. Backed by a 70-year record of industry firsts, we continue to help define global training standards with our innovative virtual-to-live training solutions to make flying safer, maintain defence force readiness and enhance patient safety. We have the broadest global presence in the industry, with over 8,500 employees, 160 sites and training locations in over 35 countries. Each year, we train more than 120,000 civil and defence crewmembers and thousands of healthcare professionals worldwide. www.cae.com
