

Lenny Genna

Vice President and General Manager,
CAE Defense & Security

Lenny Genna is Vice President and General Manager for CAE's Defense & Security business. Genna is part of a distinguished leadership team encompassing more than 6,000 employees worldwide.

Genna assumed his leadership role with CAE in August 2021, following the acquisition of the former L3Harris' Military Training business. He most recently served as President of the Military Training sector in the Aviation Systems segment of L3Harris Technologies, which included the Link Training & Simulation division, with capabilities for fixed-wing, unmanned and rotorcraft and included flight simulators, training services and maintenance training solutions. He served in this post for 11 years, providing strategic leadership to the sector's operating division.

Genna also served as Vice President of L3 Technologies' rotary wing, unmanned aerial and ground training systems, providing general management across the manufacturing and training operations. He also held successive technical and leadership roles, including engineering director, engineering manager, and instructional systems engineer on the B-2 program.

Among his other leadership roles have been as special advisor to the Board of the Link Foundation and a member of the Arlington Chamber of Commerce Board of Directors. Genna holds a bachelor's degree in electrical and computer engineering from Clarkson University.
