

Todd Probert

Group President,
Defence & Security

Todd Probert was appointed Group President of CAE's Defence & Security Group in January 2020. In this position, he leads the Defence & Security business worldwide, which focuses on helping CAE's defence customers to maintain the highest levels of mission readiness.

Todd is a senior, strategic business leader with solid international experience in defence and technology. Throughout his career, he has had a successful track record in driving business growth and creating strategic partnerships in high technology environments. Thanks to his thorough knowledge of the defence industry, he brings a fresh outlook on the future business and technology landscape for this sector. In 2019, Todd was named by WashingtonExec as one of the Top 10 Department of Defense (DOD) Executives to Watch based on business accomplishments, impact on the defence community and vision for the future. He also received the 2019 Aviation Week Program Excellence Award in the OEM Sustainment category.

Todd worked for Raytheon, the world's fourth largest defence company, over the past 10 years. Most recently, he was leading the Command, Control, Space & Intelligence business unit as part of Raytheon's Intelligence, Information and Services segment. In this role, he spearheaded Raytheon's use of commercial software development practices and artificial

intelligence for military and intelligence community customers in addition to establishing strategic relationships with Silicon Valley companies. He previously served as the Vice President of Raytheon's Mission Support & Modernization product line where he steadily grew the business during his tenure. He has formed innovative partnerships with leading tech companies to transform the development timelines and delivery of capabilities to the U.S. Department of Defense in areas such as fully open architectures, artificial intelligence and cyber security. He also held the position of Vice President, Engineering and Technology, where he managed the engineering workforce for Raytheon's Intelligence, Information and Services portfolio.

Before joining Raytheon, Mr. Probert worked for Honeywell Technology Solutions, Inc. (HTSI) in various functions such as strategy and business development, planning and operations, merger and acquisition activities, and he also served as HTSI's Chief Technology Officer. Prior to that, he worked for ANSER, where he led the Space Technology division.

Mr. Probert holds a master's degree in aeronautical and astronautical engineering from Purdue University, where he was named Outstanding Aerospace Engineer of the Year in 2017. He has a bachelor's degree in aerospace engineering from the University of Michigan.
