26 11. Selected quarterly financial information

Consolidated Interim Financial Statements

- 27 Consolidated income statement
- 28 Consolidated statement of comprehensive income
- 29 Consolidated statement of financial position
- 30 Consolidated statement of changes in equity
- 31 Consolidated statement of cash flows

Notes to the Consolidated Interim Financial Statements

- 32 Note 1 Nature of operations and summary of significant accounting policies
- 33 Note 2 Business combinations
- 33 Note 3 Operating segments and geographic information
- 35 Note 4 Other (gains) and losses
- 35 Note 5 Restructuring, integration and acquisitions costs
- 36 Note 6 Finance expense net
- 36 Note 7 Government participation
- 36 Note 8 Earnings per share
- 37 Note 9 Supplementary cash flows information
- 37 Note 10 Fair value of financial instruments
- 38 Note 11 Related party transactions

Report to Shareholders

CAE reported revenue of \$933.3 million for the first quarter of fiscal 2023, compared with \$752.7 million in the first quarter last year. First quarter net income attributable to equity holders was \$1.7 million (\$0.01 per share) compared to \$46.4 million (\$0.16 per share) last year. Adjusted net income* in the first quarter of fiscal 2023 was \$17.6 million (\$0.06 per share) compared to \$55.6 million (\$0.19 per share) last year.

Operating income this quarter was \$39.4 million (4.2% of revenue), compared to \$86.2 million (11.5% of revenue) last year. First quarter adjusted segment operating income was \$60.9 million (6.5% of revenue) compared to \$98.4 million (13.1% of revenue) last year. Adjusted segment operating income excluding COVID-19 government support programs, of which there have been none since the first quarter of fiscal 2022, was also \$60.9 million (6.5% of revenue) compared to \$84.8 million (11.3% of revenue) last year. Adjusted segment operating income this quarter of fiscal 2022, was also \$60.9 million (6.5% of revenue) compared to \$84.8 million (11.3% of revenue) last year. Adjusted segment operating income this quarter includes \$28.9 million in unfavourable contract profit adjustments in Defense, involving two programs in the U.S. All financial information is in Canadian dollars unless otherwise indicated.

"We had a mixed performance in the first quarter, with Civil delivering results in line with our view for strong annual growth, while Defense came in well short of our expectations, as a result of discrete program charges and near-term headwinds in this early stage of its multi-year growth journey," said Marc Parent, CAE's President and Chief Executive Officer. "Despite a challenging global environment, we secured over \$1 billion in total orders for a record \$10 billion backlog and 1.12 times book-to-sales ratio. In Civil, we booked \$522 million in orders for a 1.09 times book-to-sales ratio, including long-term training agreements with airlines and business aircraft operators, and 11 full-flight simulator sales. In Defense, we booked orders for training and mission support solutions valued at \$488 million for 1.18 times book-to-sales. And in Healthcare, we continued to drive double-digit revenue growth with our innovative solutions and capable team."

On CAE's revised outlook, Parent added, "we are lowering our outlook for the current fiscal year to mid-twenty percent consolidated adjusted segment operating income growth to account for the two U.S. program charges already incurred in Defense, and to reflect the more acute, sector-wide headwinds we are now experiencing, namely supply chain pressures, labour shortages, and a slower defence contracting environment. We previously indicated our expectation of a back-half-weighted performance in Defense this fiscal year, as we manage through the effects of a protracted period of less than one book-to-sales and begin to ramp up new orders in the second half. The additional Defense headwinds have made this weighting more pronounced, and we expect them to gradually abate through the course of the fiscal year. In our Civil business, we expect continued strong growth, driven largely by the cyclical aviation recovery underway and elevated demand for pilot training in commercial and business jet segments, as evidenced by robust full-flight simulator sales and the exclusive long-term training agreements we have secured in recent quarters with virtually all major airlines in the Americas. I believe our success there provides a compelling blueprint for what a broader global market recovery holds for CAE, and we are poised to continue growing market share from an expanded pipeline of Civil training opportunities. For CAE overall, order intake remains a key leading indicator of our progress along the path to becoming a larger, more resilient, and more profitable company. We greatly enhanced our position and expanded our addressable market over the last couple of years, and I have complete confidence in our team's ability to maintain a strong order momentum and drive superior and sustainable growth and profits over the long-term. Broadly speaking, the underlying trendlines of our multi-year progress are very much intact, and my conviction in CAE's long-term growth outlook is resolute. We continue to target a three-year EPS com

Civil Aviation (Civil)

First quarter Civil revenue was \$480.4 million vs. \$432.9 million in the first quarter last year. Operating income was \$75.4 million compared to \$59.0 million in the same quarter last year. Adjusted segment operating income was \$86.6 million (18.0% of revenue) compared to \$69.7 million (16.1% of revenue) in the first quarter last year. Adjusted segment operating income excluding COVID-19 government support programs, of which there was none this quarter, was also \$86.6 million (18.0% of revenue) compared to \$64.5 million (14.9% of revenue) in the same quarter last year. During the quarter, Civil delivered ten full-flight simulators (FFSs)* to customers and first quarter Civil training centre utilization* was 71%.

During the quarter, Civil signed training solutions contracts valued at \$521.5 million, including contracts for 11 FFSs sales. Notable training contracts for the quarter include several exclusive training agreements in the Americas, adding to the exclusive training agreements Civil now holds with most major airlines in the region. They include a three-year extension to a long-term exclusive commercial aviation training agreement with Mesa Airlines, a five-year exclusive training agreement with United Airlines, a five-year exclusive training agreement with JetBlue, and a ten-year exclusive training agreement with another major North American airline. In the U.K., Civil expanded its existing 12-year exclusive commercial aviation training agreement with Virgin Atlantic to include the Boeing 787 platform, now covering all their existing aircraft platforms under the training exclusivity. In business aviation, Civil signed a three-year training agreement with Tag Aviation Holdings, and a three-year agreement with the NATO Support and Procurement Agency.

The Civil book-to-sales ratio was 1.09x for the quarter and 1.32x for the last 12 months. The Civil backlog at the end of the quarter was \$5.0 billion.

Defense and Security (Defense)

First quarter Defense revenue was \$413.3 million, up 43% compared to the first quarter last year. Operating loss was \$21.2 million, compared to an income of \$22.6 million in the same quarter last year. Adjusted segment operating loss was \$21.2 million, compared to an income of \$23.7 million (8.2% of revenue) in the first quarter last year. Adjusted segment operating loss excluding COVID-19 government support programs, of which there was none this quarter, was also \$21.2 million compared to an income of \$15.7 million (5.4% of revenue) in the same quarter last year. The decrease compared to the first quarter of fiscal 2022 was driven mainly by unfavourable contract profit adjustments, which totaled \$28.9 million on a legacy L3H MT classified U.S. program and a legacy CAE U.S. training program. This followed the reassessment of cost estimates, due in part from, delays and meeting customer requirements on scope and timing, as well as a change in expectations for the expansion of program requirements, following recent discussions with the customers. Additional challenges during the quarter stemmed from staffing shortages, supply chain pressures, slower than expected order awards, and higher bid and proposal costs associated with the pursuit of a larger Defense pipeline.

Defense booked orders for \$488.0 million, including the continuation of last year's success of winning contracts across all five domains. In the Air domain, our joint venture with Leonardo Helicopter entered a contract with the Netherlands Ministry of Defence to provide a training system in support of the Joint NH90 Training Program. In Land, the US Army Synthetic Training Environment Cross Functional Team (STE CFT) awarded CAE a task order to develop a Soldier Virtual Trainer (SVT) Prototype, which is a solution to deliver immersive capabilities that empower Soldier-led training at the point-of-need. In the Sea domain, in partnership with Lockheed Martin, we were awarded a design support contract on the Royal Canadian Navy's next generation frigates or Canadian Surface Combatant (CSC). In Space, we were awarded a prototype contract from Air Force Research Lab (AFRL) Space Vehicle Directorate's Simulation & Technology Assessment Branch. The prototype is part of an initiative with the Space Technology Advanced Research – Fast-tracking Innovative Software and Hardware (STAR-FISH). And in the Cyber domain, as part of a larger team, we secured a position on the approximately \$1 billion Agile Cyber Technology (ACT 3) ID/IQ contract vehicle.

The Defense book-to-sales ratio was 1.18x for the quarter and 1.31x for the last 12 months (excluding contract options). The Defense backlog, including options and CAE's interest in joint ventures, at the end of the quarter was \$5.0 billion. The Defense pipeline remains strong with some \$9.0 billion of bids and proposals pending customer decisions.

Healthcare

First quarter Healthcare revenue was \$39.6 million, vs. \$31.6 million in the first quarter last year. Operating loss was \$5.7 million compared to an income of \$4.6 million in the same quarter last year. Adjusted segment operating loss was \$4.5 million compared to an income of \$5.0 million (15.8% of revenue) in the first quarter last year. Adjusted segment operating loss excluding COVID-19 government support programs, of which there was none this quarter, was also \$4.5 million, compared to an income of \$4.6 million (14.6% of revenue) in the same quarter last year. Healthcare continued to deliver year-over-year quarterly revenue growth. The decrease in adjusted segment operating income compared to the first quarter of fiscal 2022 was mainly due to higher net research and development costs and higher investments in selling, general and administrative expenses to support growth.

Healthcare expanded its relationship with the Mayo Clinic College of Medicine and Science, finalizing a significant partnership for its LearningSpace centre management solution for its simulation centre in Rochester, Minnesota. Healthcare also increased its presence and visibility in the U.S. in part through efforts supported by CARES Act funding and Mon Health hospital system, to address West Virginia's increased demand for nurses with three mobile training units.

Healthcare's leadership transitioned during the quarter to Jeff Evans, on an interim basis. Jeff formerly led the business unit's sales organization and has been instrumental in driving Healthcare's extended period of double-digit quarterly revenue growth.

Additional financial highlights

CAE incurred restructuring, integration and acquisition costs of \$21.5 million during the first quarter of fiscal 2023, including \$16 million related to the L3H MT and AirCentre acquisitions.

Net cash used in operating activities was \$162.6 million for the quarter, compared to \$129.1 million in the first quarter last year. Free cash flow* was negative \$182.4 million for the quarter compared to negative \$147.6 million in the first quarter last year. The decrease was mainly due to a decrease in cash provided by operating activities, partially offset by a lower investment in non-cash working capital. CAE usually sees a higher level of investment in non-cash working capital accounts during the first half of the fiscal year and tends to see a portion of these investments reverse in the second half.

Income tax recovery this quarter amounted to \$0.5 million, representing a negative effective tax rate of 16%, compared to a positive effective tax rate of 18% for the first quarter last year. The income tax rate was impacted by restructuring, integration and acquisition costs, and excluding these costs the income tax rate used to determine adjusted net income and adjusted EPS was 21% this quarter and 19% in the first quarter of last year. On this basis, the increase in the tax rate was mainly attributable to a beneficial impact on certain tax assets last year, partially offset by the change in the mix of income from various jurisdictions.

Growth and maintenance capital expenditures* totaled \$73.9 million this quarter.

Net debt* at the end of the quarter was \$3,025.9 million for a net debt-to-adjusted EBITDA* of 4.15x. This compares to net debt of \$2,700.1 million and a net debt-to-adjusted EBITDA of 3.58x at the end of the preceding quarter. CAE's total available liquidity as at June 30, 2022 was approximately \$1.4 billion.

Adjusted return on capital employed (ROCE)* was 5.2% this quarter compared to 6.2% last quarter and 6.7% in the first quarter last year. Adjusted ROCE excluding COVID-19 government support programs was 5.2% this quarter compared to 6.1% last quarter and 5.3% in the first quarter last year.

Management outlook

Since 2020, CAE has been carrying out a growth strategy which it believes will enable it to emerge from the pandemic a bigger, stronger, and more profitable company than ever before. Specifically, as a waypoint along its journey to cyclical recovery and beyond, the Company is targeting a consolidated adjusted segment operating margin of approximately 17% by the time its markets are generally recovered, with steady room for further improvement thereafter. It expects to reach this level of profitability on a significantly larger base of business with a post-pandemic capital structure that will allow the Company to sustain ample flexibility to further invest in its future. The Company is targeting a three-year (FY23-FY25) EPS compound growth rate in the mid-20% range.

Current headwinds include the ongoing global pandemic, geopolitical tensions and the war in Ukraine, decades- high inflation, slower global economic growth, and acute supply chain and labor shortages – any of which may influence the exact timing and rate of market recovery. Notwithstanding the additional volatility induced by these factors, and more acute short-term headwinds for Defense, management maintains a highly positive view of its growth potential over a multi-year period.

Expected secular trends are highly favorable for all three of the Company's core business segments. Greater desire by airlines to entrust CAE with their critical training and digital operational support and crew management needs, higher expected pilot demand and strong growth in business jet travel demand are enduring positives for the Civil business. Tailwinds that favour the Defense business include the shift in national defence priorities to an increased focus on near-peer threats and the recognition of the sharply increased need for digital immersion-based synthetic solutions. Healthcare is poised to leverage opportunities presented by an acute nursing shortage and rising demand for Public Safety and Security.

The Company believes there is considerable pent-up demand for air travel, and the rate of Civil's recovery to pre-pandemic levels and beyond is expected to continue to be driven in large part by the easing of travel restrictions. Civil's strong training performance in the Americas and FFS order activity, provide a compelling blueprint for the potential of a broader global recovery. In fiscal year 2023, in addition to continuing to grow its share of the aviation training market and expanding its position in digital flight services, Civil expects to maintain its leading share of FFS sales and to deliver upwards of 40 FFSs to customers worldwide, with a higher proportion of units expected to be delivered in second half of the fiscal year.

CAE's Defense segment is also on a multi-year path to becoming an even bigger and more profitable business. Defense is closely aligned with its customers' utmost priorities focused on defending freedom in the face of near-peer threats. In the last two years, Defense has established itself as the world's leading platform agnostic, global training and simulation pure play defence business. This is expected to bring increased potential to capture business around the world, accelerated by the acquisition of L3H MT and the expanded capability and customer set the combined entity possesses. This is evidenced by the trailing 12-month book-to-sales ratio of 1.31x. Current geopolitical events have galvanized national defence priorities in the U.S. and across NATO, and management expects increased spending and specific prioritization on defence readiness to translate into additional opportunities for CAE in the years ahead. Defense is expected to continue making good progress with the integration of L3H MT acquisition in fiscal 2023 and to fully realize \$35 to \$45 million of cost synergies by fiscal year 2024.

In the near term, Defense is expected to continue working its way through the lagging effects of a protracted period of lower than one annual book-to-sales ratios. Defense also anticipates some continuation of the first-quarter supply chain and labor challenges in subsequent quarters and for those impacts to be largely mitigated by year end, with sequential progress each quarter. Staffing shortages negatively impact Defense's execution and profitability on firm-fixed-price programs and its ability to generate revenue on cost-plus contracts. Supply chain pressures pose additional challenges that result from higher costs, execution delays and associated inefficiencies. As the year progresses, Defense expects to be able to partially offset these impacts through internal cost reduction and efficiency initiatives currently underway. The Russian invasion of Ukraine has galvanized NATO and allied nation's resolve vis-a-vis increased defence spending; however, the immediate priority on operational needs is contributing to training program award delays in the short-term. CAE continues to expect superior Defense growth over a multi-year period to be driven by the progressive realization of synergies related to the L3H MT integration and the translation of order intake and bid activity into revenue.

In Healthcare, the long-term potential is for it to become a more material and profitable business within CAE as it gains share in the healthcare simulation and training market and continues to build on its double-digit revenue growth momentum.

For the current fiscal year 2023, CAE now expects to deliver mid-20% consolidated adjusted segment operating income growth (mid-30% previously), weighted more heavily to the second half of the year.

Total capital expenditures are expected to be approximately \$250 million in fiscal year 2023, primarily in support of sustainable and accretive growth opportunities. The Company usually sees a higher investment in non-cash working capital accounts in the first half of the fiscal year, and as in previous years, management expects a portion of the non-cash working capital investment to reverse in the second half. The Company continues to target a 100% conversion of adjusted net income to free cash flow for the year. Concurrent with its continued pursuit of attractive growth opportunities, CAE expects net debt-to-adjusted EBITDA to decrease to a ratio of below three times (3x) within the next 15 months. CAE expects its effective income tax rate to increase to approximately 22% going forward, reflecting some of the recent changes to global tax regimes.

Management's outlook for fiscal year 2023 and the above targets and expectations constitute forward-looking statements within the meaning of applicable securities laws, and are based on a number of assumptions, including in relation to prevailing market conditions, macroeconomic and geopolitical factors, supply chains and labor markets, and the timing and degree of easing of global COVID-19-related mobility restrictions. Air travel is a major driver for CAE's business and management relies on analysis from the International Air Transport Association (IATA) to inform its assumptions about the rate and profile of recovery in its key civil aviation market. Additionally, as the basis of its fiscal year 2023 outlook, management assumes no further disruptions to the global economy, air traffic, CAE's operations, and its ability to deliver products and services. Expectations are also subject to a number of risks and uncertainties and based on assumptions about customer receptivity to CAE's training solutions and operational support solutions as well as material assumptions contained in this press release, quarterly MD&A and in CAE's fiscal year 2022 MD&A. Please see the sections below entitled: "Caution concerning forward-looking statements", "Material assumptions" and "Material risks".

Environmental, Social, and Governance (ESG)

During the quarter, CAE issued its FY22 Annual Activity and Corporate Social Responsibility (CSR) report, which is a single source of information in key areas demonstrating how its solutions and activities created impact across the three central dimensions of sustainability: environmental, social and governance (ESG). It also demonstrates how CAE's ESG strategy is grounded in its core purpose: safety. The report highlighted CAE's enhanced Sustainability governance and updated ESG materiality matrix that gives CAE greater confidence that it is investing in the CSR initiatives that matter most. CAE continues its reporting according to the Global Reporting Initiative (GRI), the Task force on Climate-related Financial Disclosures (TCFD) and the Sustainability Accounting Standards Board (SASB).

Underscoring its commitment to ESG leadership, CAE created a new executive committee-level position of Chief Sustainability Officer and Senior Vice President, Stakeholder Engagement, and bolstered its diversity, equity and inclusion (DE&I) program with another new leadership role, Chief DE&I Officer.

In July 2022, at the Farnborough Air Show, CAE made significant announcements that support its efforts to reduce its carbon footprint and elevate its commitment as the first carbon neutral Canadian Aerospace company and contribute to the sustainability of its industry. CAE will be advancing green aviation technology with the development of an electric conversion kit for Piper Archer aircraft. It expects to convert two-thirds of its Piper Aircraft training fleet at its flight schools around the world, while it develops the training for future pilots to operate electric aircraft. In addition, CAE has partnered with multiple Advanced Air Mobility key players by taking a leadership role in the development of this all-electric air transport industry and was more recently selected by Vertical Aerospace to be their pilot training partner for their launch eVTOL aircraft.

To learn more about CAE's corporate sustainability roadmap and achievements, the report can be downloaded at <u>https://www.cae.com/social-responsibility/</u>.

* This report includes non-GAAP and other financial measures. For information on these measures, please refer to Section 5 of CAE's Q1FY23 Management's Discussion and Analysis.

Management's Discussion and Analysis for the three months ended June 30, 2022

2. INTRODUCTION

In this report, we, us, our, CAE and Company refer to CAE Inc. and its subsidiaries. Unless we have indicated otherwise:

- This year and 2023 mean the fiscal year ending March 31, 2023;
- Last year, prior year and a year ago mean the fiscal year ended March 31, 2022;
- Dollar amounts are in Canadian dollars.

This report was prepared as of August 10, 2022 and includes our management's discussion and analysis (MD&A), unaudited consolidated interim financial statements and notes for the first quarter ended June 30, 2022. We have prepared it to help you understand our business, performance and financial condition for the first quarter of fiscal 2023. Except as otherwise indicated, all financial information has been reported in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB), and based on unaudited figures.

For additional information, please refer to our unaudited consolidated interim financial statements for the quarter ended June 30, 2022, and our annual audited consolidated financial statements, which you will find in our financial report for the year ended March 31, 2022. The MD&A section of our 2022 financial report also provides you with a view of CAE as seen through the eyes of management and helps you understand the Company from a variety of perspectives:

- Our mission;
- Our vision;
- Our strategy;
- Our operations;
- Foreign exchange;
- Non-GAAP and other financial measures;
- Consolidated results;
- Results by segment;
- Consolidated cash movements and liquidity;
- Consolidated financial position;
- Business combinations;
- Business risk and uncertainty;
- Related party transactions;
- Changes in accounting policies;
- Controls and procedures;
- Oversight role of Audit Committee and Board of Directors (the Board).

You will find our most recent financial report and Annual Information Form (AIF) on our website at www.cae.com, on SEDAR at www.sedar.com or on EDGAR at www.sec.gov. Holders of CAE's securities may also request a printed copy of the Company's consolidated financial statements and MD&A free of charge by contacting Investor Relations (investor.relations@cae.com).

ABOUT MATERIAL INFORMATION

This report includes the information we believe is material to investors after considering all circumstances, including potential market sensitivity. We consider something to be material if:

- It results in, or would reasonably be expected to result in, a significant change in the market price or value of our shares, or;
- It is likely that a reasonable investor would consider the information to be important in making an investment decision.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements about our activities, events and developments that we expect to or anticipate may occur in the future including, for example, statements about our vision, strategies, market trends and outlook, future revenues, capital spending, expansions and new initiatives, financial obligations, available liquidities, expected sales, general economic outlook, prospects and trends of an industry, expected annual recurring cost savings from operational excellence programs, estimated addressable markets, statements relating to our acquisitions of L3Harris Technologies' Military Training business (L3H MT) and Sabre's AirCentre airline operations portfolio (AirCentre), CAE's access to capital resources, the expected accretion in various financial metrics, expectations regarding anticipated cost savings and synergies, the strength, complementarity and compatibility of the L3H MT and AirCentre acquisitions with our existing business and teams, other anticipated benefits of the L3H MT and AirCentre acquisitions and their impact on our future growth, results of operations, performance, business, prospects and opportunities, our business outlook, objectives, development, plans, growth strategies and other strategic priorities, and our leadership position in our markets and other statements that are not historical facts. Forward-looking statements normally contain words like believe, expect, anticipate, plan, intend, continue, estimate, may, will, should, strategy, future and similar expressions. All such forward-looking statements are made pursuant to the "safe harbour" provisions of applicable Canadian securities laws and of the United States Private Securities Litigation Reform Act of 1995. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties associated with our business which may cause actual results in future periods to differ materially from results indicated in forward-looking statements. While these statements are based on management's expectations and assumptions regarding historical trends, current conditions and expected future developments, as well as other factors that we believe are reasonable and appropriate in the circumstances, readers are cautioned not to place undue reliance on these forward-looking statements as there is a risk that they may not be accurate.

Important risks that could cause such differences include, but are not limited to, risks relating to our business and business strategy, such as evolving standards and technology innovation and disruption, our ability to penetrate new markets, estimates of market opportunity, supply chain disruptions, original equipment manufacturer (OEM) leverage and encroachment, subcontractors, diversion of management attention, product integration and program management and execution, research and development (R&D) activities, strategic partnerships and long-term contracts, fixed-price and long-term supply contracts, backlog, customer credit risk, length of sales cycle, seasonality, and our reputation, risks relating to our markets and the international scope of our business, such as the international scope of our business, geopolitical uncertainty, global economic conditions, the military conflict in Ukraine, foreign exchange, and taxation matters, risks relating to our industries and macroeconomic conditions, such as our competitive business environment, constraints within the civil aviation industry, inflation, the continued risk of global health crises, the level and timing of defence spending, business development and awarding of new contracts, and extreme weather conditions and the impact of natural or other disasters (including effects of climate change), legal and regulatory risks, such as ethics and compliance, continued scrutiny regarding environmental, social and governance (ESG) matters, environmental laws and regulations, liability risks that may not be covered by indemnity or insurance, warranty or other product-related claims, U.S. foreign ownership, control or influence mitigation measures, compliance with laws and regulations, and government audits and investigations, risks relating to information technology, cybersecurity and intellectual property, such as reliance on third-party providers for information technology systems and infrastructure management, data rights and governance, the protection of our intellectual property and brand, and third-party intellectual property, risks relating to talent and labour, such as talent management, key personnel and management, corporate culture, and labour relations, risks relating to mergers, acquisitions, joint ventures, strategic alliances or divestitures, such as the risk that we will not effectively manage our growth, integration risks, our continued reliance on certain parties and information, and acquisition and integration costs, risks relating to controls and accounting matters, such as the effectiveness of internal controls over financial reporting, estimates used in accounting, impairment risk, and pension plans funding, risks relating to indebtedness and liquidity, such as indebtedness to finance acquisitions and ability to meet debt service requirements, availability of capital, liquidity risk, and interest rate volatility, and risks relating to our common shares and ownership of our securities, such as sales of additional common shares, the market price and volatility of our common shares, returns to shareholders, our foreign private issuer status, and enforceability of civil liabilities against our directors and officers. The foregoing list is not exhaustive and other unknown or unpredictable factors could also have a material adverse effect on the performance or results of CAE. Additionally, differences could arise because of events announced or completed after the date of this report. You will find more information about the risks and uncertainties affecting our business in our 2022 financial report. Any one or more of the factors described above and elsewhere in this MD&A may be exacerbated by the continuing COVID-19 pandemic and may have a heightened negative impact on CAE's business, results of operations and financial condition. Accordingly, readers are cautioned that any of the disclosed risks could have a material adverse effect on CAE's forward-looking statements. Readers are also cautioned that the risks described above and elsewhere in this MD&A are not necessarily the only ones we face; additional risks and uncertainties that are presently unknown to us or that we may currently deem immaterial may adversely affect our business.

Except as required by law, we disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise. The forward-looking information and statements contained in this report are expressly qualified by this cautionary statement.

In addition, statements that "we believe" and similar statements reflect our beliefs and opinions on the relevant subject. These statements are based on information available to us as of the date of this report. While we believe that information provides a reasonable basis for these statements, that information may be limited or incomplete. Our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all relevant information. These statements are inherently uncertain, and investors are cautioned not to unduly rely on these statements.

MATERIAL ASSUMPTIONS

The forward-looking statements set out in this report are based on certain assumptions including, without limitation: the anticipated negative impacts of the COVID-19 pandemic on our businesses, operating results, cash flows and/or financial condition, including the intended effect of mitigation measures implemented as a result of the COVID-19 pandemic and the timing and degree of easing of global COVID-19-related mobility restrictions, the prevailing market conditions, customer receptivity to CAE's training and operational support solutions, the accuracy of our estimates of addressable markets and market opportunity, the realization of anticipated annual recurring cost savings and other intended benefits from recent restructuring initiatives and operational excellence programs, the ability to respond to anticipated inflationary pressures and our ability to pass along rising costs through increased prices, the actual impact to supply, production levels, and costs from global supply chain logistics challenges, the stability of foreign exchange rates, the ability to hedge exposures to fluctuations in interest rates and foreign exchange rates, the availability of borrowings to be drawn down under, and the utilization, of one or more of our senior credit agreements, our available liquidity from cash and cash equivalents, undrawn amounts on our revolving credit facilities, the balance available under our receivable purchase facility, our cash flows from operations and continued access to debt funding will be sufficient to meet financial requirements in the foreseeable future, access to expected capital resources within anticipated timeframes, no material financial, operational or competitive consequences from changes in regulations affecting our business, our ability to retain and attract new business, our ability to achieve synergies and maintain market position arising from successful integration plans relating to the L3H MT and AirCentre acquisitions, our ability to otherwise complete the integration of the L3H MT and AirCentre businesses acquired within anticipated time periods and at expected cost levels, our ability to attract and retain key employees in connection with the L3H MT and AirCentre acquisitions, management's estimates and expectations in relation to future economic and business conditions and other factors in relation to the L3H MT and AirCentre acquisitions and resulting impact on growth and accretion in various financial metrics, the realization of the expected strategic, financial and other benefits of the L3H MT and AirCentre acquisitions in the timeframe anticipated, economic and political environments and industry conditions, the accuracy and completeness of public and other disclosure, including financial disclosure, by L3Harris Technologies and AirCentre, absence of significant undisclosed costs or liabilities associated with the L3H MT and AirCentre acquisitions. For additional information, including with respect to other assumptions underlying the forward-looking statements made in this report, refer to our 2022 financial report. Given the impact of the changing circumstances surrounding the COVID-19 pandemic and the related response from CAE, governments, regulatory authorities, businesses and customers, there is inherently more uncertainty associated with CAE's assumptions. Air travel is a major driver for CAE's business and management relies on analysis from the International Air Transport Association (IATA) to inform its assumptions about the rate and profile of recovery in its key civil aviation market. Accordingly, the assumptions outlined in this report and, consequently, the forward-looking statements based on such assumptions, may turn out to be inaccurate.

3. ABOUT CAE

3.1 Who we are

At CAE, we equip people in critical roles with the expertise and solutions to create a safer world. As a technology company, we digitalize the physical world, deploying simulation training and critical operations support solutions. Above all else, we empower pilots, airlines, defence and security forces, and healthcare practitioners to perform at their best every day and when the stakes are the highest. Around the globe, we're everywhere customers need us to be with more than 13,000 employees in more than 200 sites and training locations in over 40 countries. CAE represents 75 years of industry firsts—the highest-fidelity flight and mission simulators, surgical manikins, and personalized training programs powered by artificial intelligence. We're investing our time and resources into building the next generation of cutting-edge, digitally immersive training and critical operations solutions while keeping positive environmental, social and governance (ESG) impact at the core of our mission. Today and tomorrow, we'll make sure our customers are ready for the moments that matter.

CAE's common shares are listed on the Toronto and New York stock exchanges (TSX / NYSE) under the symbol CAE.

3.2 Our mission

To lead at the frontier of digital immersion with high-tech training and operational support solutions to make the world a safer place.

3.3 Our vision

To be the worldwide partner of choice in civil aviation, defence and security and healthcare by revolutionizing our customers' training and critical operations with digitally immersive solutions to elevate safety, efficiency and readiness.

3.4 Our strategy

CAE's eight pillars of strength

We believe there are eight fundamental strengths that underpin our strategy and investment thesis:

- High degree of recurring business;
- Industry leader with a strong competitive moat;
- Headroom in large markets;
- Technology and industry thought leader;
- Potential for compound growth and superior returns over the long-term;
- Culture of innovation, empowerment, excellence and integrity;
- Excellent and diverse team with a unique social impact on safety;
- Solid financial position and highly cash generative business model.

High degree of recurring business

We operate in highly regulated industries with mandatory and recurring training requirements for maintaining professional certifications. Over 60% of our business is derived from the provision of technology-enabled services and software-based solutions, which is an important source of recurring business, and largely involves long-term agreements with many airlines, business aircraft operators and defence forces.

Industry leader with a strong competitive moat

We are an industry leader in each of our three segments by way of scale, the range of our technological solutions and services, and our global reach. We benefit from a strong competitive moat, fortified by seven decades of industry firsts and by continuously pushing the boundaries using digitally immersive, high-tech training and operational support solutions. Our broad global training network, unique end-to-end cadet to captain training capacities, technology-intensive training and operational support solutions, deep subject matter expertise and industry thought leadership, unrivaled customer intimacy and strong, recognizable brand further strengthen our competitive moat.

Headroom in large markets

We provide innovative training and operational support solutions to customers in large addressable markets in civil aviation, defence and security and healthcare. We believe significant untapped market opportunities exist in these three core businesses, with substantial headroom to grow our market share and expand along adjacencies over the long-term.

Technology and industry thought leader

CAE is a high-tech training and operational support solutions company and an industry thought leader in the application of modelling and simulation, virtual reality and advanced analytics to create highly innovative and digitally immersive training and operational support solutions for customers in civil aviation, defence and security and healthcare.

Potential for compound growth and superior returns over the long-term

In each of our businesses, we believe we have the potential to grow at a rate superior to our underlying markets because of our potential to gain share within the markets we serve and expand through adjacencies. Our rising proportion of recurring revenue is largely driven by our customers' ongoing training, operational support requirements and our ability to assist them with these critical activities by means of our highly innovative products, and technology- and software-enabled service solutions. We leverage our leading market position to deepen and expand our customer relationships and gain more share of their critical responsibilities. We expect to optimize and increase the utilization of our global training network and to deploy new assets with accretive returns, over the long-term.

Culture of innovation, empowerment, excellence and integrity

One CAE is the internal mantra that represents our culture of innovation, empowerment, excellence and integrity. It is the combination of these four key attributes that provides CAE with its market leadership, strong reputation and high degree of customer intimacy.

Excellent and diverse team with a unique social impact on safety

CAE prides itself in having an excellent and diverse team with a unique social impact on safety. Each day, our employees support our customers' most critical operations with the most innovative solutions and in doing so, they help make the world a safer place. We help make air travel and healthcare safer and help our defence forces maintain security.

Solid financial position and highly cash generative business model

A constant priority for CAE is the maintenance of a solid financial position and we use established criteria to evaluate capital allocation opportunities. Our business model and training network, specifically, is highly cash generative by nature.

3.5 Our operations

We provide digitally immersive training and operational support solutions to three markets globally:

- The civil aviation market includes major commercial airlines, regional airlines, business aircraft operators, civil helicopter operators, aircraft manufacturers, third-party training centres, flight training organizations, maintenance repair and overhaul organizations (MRO) and aircraft finance leasing companies;
- The defence and security market includes defence forces, OEMs, government agencies and public safety organizations worldwide;
- The healthcare market includes hospital and university simulation centres, medical and nursing schools, paramedic organizations, defence forces, medical societies, public health agencies and OEMs.

RUSSIAN INVASION OF UKRAINE

In light of Russia's invasion of Ukraine, CAE announced that it suspended all services and training to Russian airlines, aircraft operators and healthcare distributors. Although Russia does not represent a large market for CAE, the suspension of its related activities is expected to continue to have some direct impact on financial performance. The magnitude of potential further indirect impacts on CAE are expected to be a function of the duration, severity, and scope of this geopolitical and humanitarian crisis. Beyond these impacts, the potential negative impacts on our businesses would most likely further result from the added economic fallout of this event, which is contributing to the high cost of fuel and high inflation, as well as government award reprioritizations specifically for our Defense segment. These macroeconomic forces impact our Civil customers' operating costs and could potentially impact consumer demand for air travel. We have based our market recovery expectations on the IATA forecast for passenger traffic recovery and growth. Overall, these events increase uncertainty about the timeline of a broad global recovery in our Civil markets. This crisis is a stark reminder that the world needs to be prepared to defend freedom at a moment's notice and CAE's Defense and Security business is positioned to support that preparedness and is aligned with national defence priorities focused on near-peer threats involving multiple domains. Actual and expected increased defence spending across NATO and allied nations and a greater emphasis on mission preparedness are likely to lead to increased activity would potentially translate to higher performance for CAE Defense in the years ahead.

CIVIL AVIATION MARKET

We provide comprehensive training solutions for flight, cabin, maintenance and ground personnel in commercial, business and helicopter aviation, a complete range of flight simulation training devices, ab initio pilot training and crew sourcing services, as well as end-to-end digitally-enabled crew management, training operations solutions and optimization software.

We have the unique capability and global scale to address the total lifecycle needs of the professional pilot, from cadet to captain, with our comprehensive aviation training solutions. We are the world's largest provider of civil aviation training services. Our deep industry experience and thought leadership, large installed base, strong relationships, and reputation as a trusted partner, enable us to access a broader share of the market than any other company in our industry. We provide aviation training services in more than 35 countries and through our broad global network of approximately 70 training locations, we serve all sectors of civil aviation including airlines and other commercial, business and helicopter aviation operators.

Among our thousands of customers, we have long-term training centre operations and training services agreements and joint ventures with approximately 40 major airlines and aircraft operators around the world. Our range of training solutions includes product and service offerings for pilot, cabin crew and aircraft maintenance technician training, training centre operations, curriculum development, courseware solutions and consulting services. We currently manage 318 full-flight simulators (FFSs)², including those operating in our joint ventures. We offer industry-leading technology, and we are shaping the future of training through innovations such as our next generation training systems, including CAE Real-time Insights and Standardized Evaluations (CAE RiseTM), which improves training quality, objectivity and efficiency through the integration of untapped flight and simulator data-driven insights into training. In the development of new pilots, CAE operates the largest ab initio flight training network in the world and has over 20 cadet training programs globally. In resource management, CAE is the global market leader in the provision of flight crew and technical personnel to airlines, aircraft leasing companies, manufacturers, and MRO companies worldwide. With the acquisition of AirCentre, paired with our existing crew operations and optimization software, we are in a position to provide robust end-to-end flight management and crew optimization solutions, helping airlines and business aircraft operators make optimal data-driven decisions.

² Non-GAAP and other financial measures (see Section 5).

Quality, fidelity, reliability, and innovation are hallmarks of the CAE brand in flight simulation and we are the world leader in the development of civil flight simulators. We continuously innovate our processes and lead the market in the design, manufacture, and integration of civil FFSs for major and regional commercial airlines, business aircraft operators, third-party training centres and OEMs. For example, as we are entering a new era of aviation with advanced air mobility, disruptive aerospace companies are building new aircraft types from the ground up. This will create a large demand for trained professional pilots to safely fly both passengers and cargo across markets. CAE has already partnered with five of the leading electric vertical takeoff and landing (eVTOL) developers, including Jaunt Air Mobility to design and develop an Aircraft System integration lab and jointly build an engineering simulator which will accelerate cockpit design and system development and will reduce the airworthiness flight test time, Volocopter as authorized training provider and to develop an eVTOL pilot training program in preparation for Volocopter's first eVTOL aircraft entry-into-service, BETA Technologies to design and develop pilot and maintenance training programs for the ALIA eVTOL aircraft with a focus on training design and courseware and most recently, Joby Aviation Inc. to develop and qualify flight simulation training devices that will be used to train the future pilots of their revolutionary eVTOL aircraft. Most recently, we were selected by Vertical Aerospace as the worldwide training partner for the launch of Vertical's eVTOL aircraft, the VX4. We have established a wealth of experience in developing first-to-market simulators for more than 35 types of aircraft models. Our flight simulation equipment, including FFSs, are designed to meet the rigorous demands of their long and active service lives, often spanning several decades of continuous use. Our global reach enables us to provide best-in-class support services such as real-time, remote monitoring and enables us to leverage our extensive worldwide network of spare parts and service teams.

Commercial flight activity has continued to improve compared to calendar 2021. As per the International Air Transport Association (IATA), global air passenger demand, or revenue passenger-kilometers (RPKs), has shown a strong increase of 83% for the first six months of calendar 2022 compared to calendar 2021. Europe showed the strongest improvement, with an 217% increase, followed by North America with a 75% increase. Asia showed some improvement in flight numbers, with an increase of 4% over the same period.

Air cargo has seen a reduction in demand in recent months, with cargo tonne-kilometers down 4.3% for the first six months of calendar 2022 compared to calendar 2021. This reduction is primarily due to the proliferation of the new COVID-19 variants of the virus and restrictions in China hampering supply chain and production activity, along with the Russian invasion of Ukraine which is also causing supply chain and cargo capacity issues.

In business aviation, both the U.S. Federal Aviation Administration (FAA) and Eurocontrol, the European Organisation for the Safety of Air Navigation have reported strong levels of flight activity compared to calendar 2021 levels. The FAA has shown an increase of 30% in the total number of business jet flights, which includes all domestic and international flights over the past 12 months. Similarly, the European business jet market remains in strong growth; according to Eurocontrol, the total number of business aviation flights in Europe have shown a strong increase of 37% over the same period.

In November 2020, we released our 2020-2029 Pilot Demand Outlook in which we estimate an expected global requirement of 264,000 new pilots in the civil aviation industry to sustain growth and support mandatory retirements over the next ten years. In the short-term, we estimated that approximately 27,000 of these new professional pilots were expected to be needed starting in late calendar 2021. Furthermore, in June 2021, we released a report on Pilot Training for Advanced Air Mobility (AAM) which estimates that AAM will create an additional surge in demand for pilots, which could be close to 60,000 pilots by 2028.

We believe the Civil Aviation segment is positioned as a gateway in a highly regulated, secular growth market, with an addressable market estimated at approximately \$6.5 billion, and headroom for growth.

Market drivers

Demand for training and flight operations solutions in the civil aviation market is driven by the following:

- Pilot and maintenance training and industry regulations;
- Safety and efficiency imperatives of commercial airlines and business aircraft operators, including fuel and crew costs;
- Expected long-term secular global growth in air travel;
- Expected long-term growth, including new aircraft deliveries and renewal of the active fleet of commercial and business aircraft;
- Emergence of the newer market for advanced air mobility;
- Demand for trained aviation professionals;
- Complexity of flight operations solutions.

Profitability drivers

We believe profitability drivers for CAE's civil aviation market include the following:

- Favourable business mix drivers, including large market headroom in training services;
- Potential to increase the ratio of wet versus dry training in commercial training;
- Expansion of operational support offering by using advanced analytics, software solutions and digital technology to enhance our value offering across the whole organization;
- Operational excellence programs expected to realize significant annual recurring cost savings;
- Training outsourcing and partnerships.

DEFENSE AND SECURITY MARKET

We are a platform agnostic, global training and simulation pure play focusing on ensuring mission readiness by integrating systems and solutions across all five domains for government organizations responsible for public safety.

Defense and Security confronts the realities facing our customers and aligns our business so we are best positioned to address those needs. First and foremost is the shift in the nature of conflicts for the U.S. and its allies to address the near-peer threat across multi-domain operations – air, land, sea, space and cyber. The near-peer competition, coupled with rapid development in training demands, adds to requirements for advanced training capabilities and agile solutions to support cyber-secured, all-domain synthetic environments. These immersive synthetic networks will become much more prevalent as a key means for defence forces to "train as they fight" across multi-domain operations. As the world reacts to the change in conflict, the need for revolutionary digital training and next generation situational awareness solutions becomes even more critical.

To address our customer requirements in this rapidly changing environment, we have aligned to the priorities set forth in the U.S. National Defense Strategy which outlines the need for the US and its allies to enhance training and readiness across complex, multi-domain operations. This includes the continued requirement to develop strategic partnerships with the customer and across industry. Through strategic acquisitions and teaming arrangements, we continue to accelerate our strategy as a platform agnostic, global training and simulation pure play focusing on ensuring mission readiness by integrating systems and solutions across all five domains.

Continued investment in digital training and next generation situational awareness solutions help our defence customers plan, prepare, and analyze to enhance performance and make better decisions across multi-domain operations. Most militaries use a combination of live training on actual platforms, virtual training in simulators, and constructive training using computer-generated simulations. While militaries will always do some level of live training exercises, we believe there will be an increasing reliance on immersive virtual training in order to prepare in a secured environment while decreasing the reliance on more costly, carbon dependent live-flying training. These immersive synthetic environments are also being leveraged more and more for mission and operational support by enabling course of action analysis and data-centric decision support.

We have delivered simulation products and training services to approximately 60 defence forces in over 50 countries. We provide training support services such as contractor logistics support, maintenance services, systems engineering, staff augmentation, classroom instruction and simulator training at over 145 sites around the world, including our joint ventures.

Training Systems and Solutions

As an industry leader in training and simulation, CAE's agnostic approach ensures mission readiness for government organizations responsible for public safety. Following our transformative expansion in 2021, we have solidified our leadership in the air domain, augmented our capabilities in land and sea, and won strategic prime positions in the space and cyber markets. With competitive, prime wins in all five domains during the last fiscal year, we continue to expand our capabilities and lead integration of the digital transformation across defence and security markets. Under the United States Air Force (USAF) Simulators Common Architecture Requirements and Standards (SCARS) program, we are the prime contractor entrusted to integrate and standardize aircraft training simulator design and operation, including strict cybersecurity criteria, to support distributed and networked mission training. This partnership highlights our focus on strategic integration contracts, pushing the boundary of mission readiness capabilities, and is key to our future growth.

Flight Training Organizations

Our live-flying capabilities continue to expand. In fiscal 2022, the North Atlantic Treaty Organization (NATO) and the Government of Canada announced an extension of the contract with CAE through 2027, with an option through 2028 if necessary, as it looks to transition to the next-generation Future Aircrew Training (FACT) program. Last quarter, we also launched our ab initio flight training program at our new training facility at the Bremen airport in Germany which provides academic, simulator and live-flying training services to the German Air Force, as well as a training site in Montpellier, France. Other training solution programs include the International Flight Training School in Italy, a joint venture between CAE and Leonardo, the USAF Initial Flight Training program where all USAF pilot candidates begin their aviation career and the Army Fixed-Wing Flight Training programs in the U.S., as we help our customers achieve an optimal balance across their training enterprise. Additionally, we have a 37% equity interest in the flight training to U.S. and international military customers, and with this partnership, we now deliver best-in-class initial flight training across the USAF, Army and Navy along with international student pilots.

Mission and Operational Support Solutions

Defense and Security customers continue to require an increase in solutions leveraging synthetic environments and digitally immersive technologies to provide a range of mission support. We are the prime contractor for the U.S. Special Operations Command on the Mission Command System Common Operational Picture (MCS/COP) program, delivering enhanced and improved global situational awareness. We were selected as the partner of choice to the U.S. Special Operations Command by combining decades of experience creating digital ecosystems with our multi-source data fusion and artificial intelligence/machine learning capabilities to provide a single visualization platform to support collaborative command and control decision-making in real-time. This unique combination of experience, digital technology and subject matter expertise has also provided opportunities with new customers and within emerging, complex markets. Last year, we were awarded our first prime opportunity for the U.S. Intelligence Agency (NGA). In alignment with the U.S. National Defense Strategy priorities, the Beyond 3D project aims to accelerate NGA's ability to process, exploit, disseminate and generate 3D geospatial data to support real-time analysis, mission planning and tactical operations.

Synthetic Environments

We support the development of a Single Synthetic Environment for the United Kingdom's Strategic Command, the major organization of the British Armed Forces responsible for leading integration across all domains — air, land, sea, space and cyber. We continue expanding and extending our addressable market into mission and operational support. Employing our modeling and simulation expertise, we enable defence forces to use synthetic environments for planning, analysis and operational decision support. We are at the forefront of the digital evolution where synthetic environments play an increasingly important role in multi-domain operations.

We believe the Defense and Security segment is positioned as a strategic partner for training and mission support across multi-domain operations and continues to develop as global leader in digitally immersive training and operational support solutions. We estimate our addressable defence market across all five domains to be approximately \$14.3 billion with the largest opportunity remaining in the air domain where CAE is the platform-agnostic leader.

Market drivers

Demand for training and operational support solutions in the defence and security markets is driven by the following:

- Defence budgets;
- Installed base of enduring defence platforms and new customers;
- Attractiveness of outsourcing training, maintenance and operational support services;
- Pilot and aircrew recruitment, training and retention challenges faced by militaries globally;
- Desire to network and integrate training systems to achieve efficiencies and better prepare for the complexities of conflict in a joint multi-domain environment;
- Desire of governments and defence forces to increase the use of synthetic environments as a more cost effective and environmentally friendly solution for training, planning, analysis and decision support;
- Progression of commercially available digital technology enablers for training solutions.

Profitability drivers

We believe profitability drivers for CAE's defence and security market include the following:

- Leading platform-agnostic training and simulation integrator leveraging solutions across a global footprint;
- Access to strategic contract vehicles, allowing flexibility to offer solutions to more customers and at the point of need;
- Adding customers with more complex problem sets and solution demands to include space and cyber domains and the intelligence community;
- Partnering with OEMs on next-generation platforms for more effective and efficient program execution;
- Operational focus on improving contracting, sub-contracting and program delivery quality processes.

HEALTHCARE MARKET

We offer healthcare students and clinical professionals innovative, integrated and virtual education and training solutions, including interventional and imaging simulations, curricula, audiovisual debriefing solutions, centre management platforms and patient simulators.

Simulation-based training is one of the most effective ways to prepare healthcare practitioners for the moments that matter: treating patients, handling critical situations and reducing medical errors. The experience and best practices gained over our 75-year simulation-based aviation training history apply seamlessly to healthcare, and we leverage those lessons to deliver innovative solutions that accelerate healthcare learning, enhance training and ultimately improve the quality and availability of patient care. The COVID-19 pandemic profoundly affected the healthcare industry, highlighting an already tenuous situation: increased demand for nurses complicated by decreased student access to both patients and clinical sites as well as an unchanging and lengthy education timeline. Based on our experiences in aviation and defence, we are well-suited to address the challenges of this evolving healthcare environment. As a result, we see healthcare training and simulation as growth markets propelled by multiple secular tailwinds, including an aging population necessitating increased care; a global shortage of nurses; an increase in preventable medical errors; limited hospital beds; and pandemic-related attrition of the healthcare workforce. All of this necessitates innovation in and acceleration of healthcare education and certification, which can be accomplished through simulation. Pre-COVID, only 17 U.S. states accepted simulation for 50 percent of clinical training hours. Since the pandemic began, every state has introduced or passed such legislation.

We are well-positioned to capture growing demand for nursing and simulation-based training through our broad and innovative portfolios of medical training solutions, including patient, ultrasound and interventional simulators, audiovisual debriefing solutions, centre management platforms, augmented reality applications and e-learning simulation-based curricula. We provide training solutions to customers in more than 95 countries, and are a leader in the design, development and delivery of patient simulators based on advanced models of human physiology to realistically reflect human responses to clinical interventions. We apply that same degree of rigour and innovation to our digital, remote and virtual simulation solutions. For example, Vimedix, our advanced ultrasound simulator now offers augmented reality for remote and virtual learning, significantly reducing the time it takes to master ultrasound scanning and comprehend ultrasonographic anatomy. Our learning management system consolidates the delivery of digital learning solutions to augment simulation-centre-based training, giving learners the ability to learn anytime, anywhere and at their own pace, amplifying access to education and training, regardless of geographical limitations. We leverage advanced technologies to build sophisticated digital capabilities that improve patient outcomes that are gaining broad acceptance and adoption in the market. Mixed reality is featured across our portfolio, including patient simulation (AresAR and LucinaAR), interventional simulation (CathLabVR), and ultrasound simulation (VimedixAR). We provide these advanced technologies and innovative learning tools to hospitals and academic institutions, which represent the largest segment of the healthcare simulation market.

We also deliver peer-to-peer training at customer sites as well as in our training centres in Canada, Germany, the U.K. and the U.S. Our Healthcare educational resources include adjunct faculty consisting of nurses, respiratory therapists, physicians, paramedics and sonographers who, in collaboration with leading healthcare institutions, have developed approximately 200 Learning Modules for patient simulators and over 3,600 simulated clinical experience courseware packages for our customers across our virtual and physical platforms. We offer turnkey solutions, project management and professional services for healthcare simulation programs. We also collaborate with medical device companies and scientific societies to develop innovative and custom training solutions.

We see future opportunities arising in the Healthcare business, including supporting government customers; growing acceptance of new digital and virtual learning products and increased recognition of the value of simulation-based preparedness for pandemics and other high-risk scenarios. This is supported by professional organizations, such as the International Nursing Association of Clinical Simulation and Learning (INASCL) and the Society for Simulation in Healthcare, that have encouraged regulatory bodies and policymakers to demonstrate flexibility by replacing the clinical hours usually completed in a live healthcare setting with virtually simulated experiences.

We believe the Healthcare segment is positioned as a leader in developing healthcare professionals through technology, educational content and training, with an estimated healthcare simulation market of approximately US\$1.7 billion. North America is the largest market for healthcare simulation, followed by Europe and Asia.

Market drivers

Demand for our simulation products and services in the healthcare market is driven by the following:

- Limited access to patients for educational and clinical development purposes;
- Evolving medical technologies and growing use and acceptance of remote and virtual delivery methods;
- Rising use of simulation, with a demand for innovative and custom training approaches to prevent medical errors;
- Increased focus on pandemic and disaster preparedness;
- Global shortage amid an increased demand for healthcare personnel;
- Growing emphasis on patient safety and outcomes.

You will find more information about our operations in our fiscal 2022 financial report, AIF and our Annual Activity and Corporate Social Responsibility Report.

4. FOREIGN EXCHANGE

We report all dollar amounts in Canadian dollars. We value assets, liabilities and transactions that are measured in foreign currencies using various exchange rates as required by IFRS.

The tables below show the variations of the closing and average exchange rates for the three main currencies in which we operate.

We used the closing foreign exchange rates below to value our assets, liabilities and backlog in Canadian dollars at the end of each of the following periods:

	June 30	March 31	Increase /
	2022	2022	(decrease)
U.S. dollar (US\$ or USD)	1.29	1.25	3 %
Euro (€ or EUR)	1.35	1.38	(2 %)
British pound (£ or GBP)	1.57	1.64	(4 %)

We used the average quarterly foreign exchange rates below to value our revenues and expenses:

	June 30	June 30	Increase /
	2022	2021	(decrease)
U.S. dollar (US\$ or USD)	1.28	1.23	4 %
Euro (€ or EUR)	1.36	1.48	(8 %)
British pound (£ or GBP)	1.61	1.72	(6 %)

The effect of translating the results of our foreign operations into Canadian dollars resulted in an increase in this quarter's revenue of \$5.0 million and an increase in net income of \$0.3 million when compared to the first quarter of fiscal 2022. We calculated this by translating the current quarter foreign currency revenue and net income using the average monthly exchange rates from the prior year's first quarter and comparing these adjusted amounts to our current quarter reported results. You will find more details about our foreign exchange exposure and hedging strategies in *Business Risk and Uncertainty* in our 2022 financial report.

5. NON-GAAP AND OTHER FINANCIAL MEASURES

This MD&A includes non-GAAP and other financial measures. Non-GAAP measures are useful supplemental information but do not have a standardized meaning according to GAAP. These measures should not be confused with, or used as an alternative for, performance measures calculated according to GAAP. Furthermore, these non-GAAP measures should not be compared with similarly titled measures provided or used by other companies.

5.1 Non-GAAP and other financial measure definitions

Adjusted earnings or loss per share (EPS)

Adjusted earnings or loss per share is a non-GAAP financial measure calculated by excluding restructuring, integration and acquisition costs, and impairments and other gains and losses arising from significant strategic transactions or specific events, after tax, as well as significant one-time tax items from the diluted earnings per share from continuing operations attributable to equity holders of the Company. The effect per share is obtained by dividing these restructuring, integration and acquisition costs and, impairments and other gains and losses, after tax, as well as one-time tax items by the weighted average number of diluted shares. We track it because we believe it provides a better indication of our operating performance on a per share basis and facilitates the comparison across reporting periods.

Adjusted earnings or loss per share excluding COVID-19 government support programs further excludes the impacts of government contributions related to COVID-19 support programs that were credited to income, after tax, but does not adjust for COVID-19 heightened operating costs that we have been carrying and that have been included in our results. Refer to section 5.2 "Non-GAAP measure reconciliations" of this MD&A for a reconciliation of these measures to the most directly comparable measure under GAAP.

Adjusted net income or loss

Adjusted net income or loss is a non-GAAP financial measure we use as an alternate view of our operating results. We calculate it by taking our net income attributable to equity holders of the Company from continuing operations and excluding restructuring, integration and acquisition costs, and impairments and other gains and losses arising from significant strategic transactions or specific events, after tax, as well as significant one-time tax items. We track it because we believe it provides a better indication of our operating performance and facilitates the comparison across reporting periods.

Adjusted net income or loss excluding COVID-19 government support programs further excludes the impacts of government contributions related to COVID-19 support programs that were credited to income, after tax, but does not adjust for COVID-19 heightened operating costs that we have been carrying and that have been included in our results. Refer to section 5.2 "Non-GAAP measure reconciliations" of this MD&A for a reconciliation of these measures to the most directly comparable measure under GAAP.

Adjusted segment operating income or loss (SOI)

Adjusted segment operating income or loss is a total of segments measure and is the sum of our key indicators of each segment's financial performance. Adjusted segment operating income or loss gives us an indication of the profitability of each segment because it does not include the impact of any items not specifically related to the segment's performance. We calculate adjusted segment operating income and excluding restructuring, integration and acquisition costs, and impairments and other gains and losses arising from significant strategic transactions or specific events. We track it because we believe it provides a better indication of our operating performance and facilitates the comparison across reporting periods. Additionally, adjusted segment operating income or loss is the profitability measure employed by management for making decisions about allocating resources to segments and assessing segment performance.

Adjusted segment operating income or loss excluding COVID-19 government support programs further excludes the impacts of government contributions related to COVID-19 support programs that were credited to income but does not adjust for COVID-19 heightened operating costs that we have been carrying and that have been included in our results. While management is aware of such further adjusted measure, it is not specifically employed by management as a profitability measure for making decisions about allocating resources to segments and assessing segment performance. Refer to section 5.2 "Non-GAAP measure reconciliations" of this MD&A for a reconciliation of these measures to the most directly comparable measure under GAAP.

Capital employed

Capital employed

Capital employed is a non-GAAP financial measure we use to evaluate and monitor how much we are investing in our business. We measure it from two perspectives:

Capital used:

- For the Company as a whole, we take total assets (not including cash and cash equivalents), and subtract total liabilities (not including long-term debt and the current portion of long-term debt);
- For each segment, we take the total assets (not including cash and cash equivalents, tax accounts and other non-operating assets), and subtract total liabilities (not including tax accounts, long-term debt and the current portion of long-term debt, royalty obligations, employee benefit obligations and other non-operating liabilities).

Source of capital:

- In order to understand our source of capital, we add net debt to total equity.

Refer to section 9.1 "Consolidated capital employed" of this MD&A for a reconciliation of this measure to the most directly comparable measure under GAAP.

Return on capital employed (ROCE)

ROCE is a non-GAAP ratio used to evaluate the profitability of our invested capital. We calculate this ratio over a rolling four-quarter period by taking net income attributable to equity holders of the Company excluding net finance expense, after tax, divided by the average capital employed.

Capital expenditures (maintenance and growth) from property, plant and equipment

Maintenance capital expenditure is a supplementary financial measure we use to calculate the investment needed to sustain the current level of economic activity.

Growth capital expenditure is a supplementary financial measure we use to calculate the investment needed to increase the current level of economic activity.

Free cash flow

Free cash flow is a non-GAAP financial measure that shows us how much cash we have available to invest in growth opportunities, repay debt and meet ongoing financial obligations. We use it as an indicator of our financial strength and liquidity. We calculate it by taking the net cash generated by our continuing operating activities, subtracting maintenance capital expenditures, changes in ERP and other assets not related to growth and dividends paid and adding proceeds from the disposal of property, plant and equipment, dividends received from equity accounted investees and proceeds, net of payments, from equity accounted investees. Refer to section 8.1 "Consolidated cash movements" of this MD&A for a reconciliation of this measure to the most directly comparable measure under GAAP.

Net debt

Net debt is a capital management measure we use to monitor how much debt we have after taking into account cash and cash equivalents. We use it as an indicator of our overall financial position, and calculate it by taking our total long-term debt, including the current portion of long-term debt, and subtracting cash and cash equivalents. Refer to section 9.1 "Consolidated capital employed" of this MD&A for a reconciliation of this measure to the most directly comparable measure under GAAP.

Net debt-to-capital is a capital management measure calculated as net debt divided by the sum of total equity plus net debt.

Net debt-to-EBITDA and net debt-to-adjusted EBITDA are non-GAAP ratios calculated as net debt divided by the last twelve months EBITDA. EBITDA comprises earnings before income taxes, finance expense – net, depreciation and amortization. Adjusted EBITDA further excludes restructuring, integration and acquisition costs, and impairments and other gains and losses arising from significant strategic transactions or specific events. Refer to section 5.2 "Non-GAAP measure reconciliations" of this MD&A for a reconciliation of these measures to the most directly comparable measure under GAAP.

Non-cash working capital

Non-cash working capital is a non-GAAP financial measure we use to monitor how much money we have committed in the day-to-day operation of our business. We calculate it by taking current assets (not including cash and cash equivalents and assets held for sale) and subtracting current liabilities (not including the current portion of long-term debt and liabilities held for sale). Refer to section 9.1 "Consolidated capital employed" of this MD&A for a reconciliation of this measure to the most directly comparable measure under GAAP.

Order intake and Backlog

Order intake

Order intake is a supplementary financial measure that represents the expected value of orders we have received:

- For the Civil Aviation segment, we consider an item part of our order intake when we have a legally binding commercial agreement with a client that includes enough detail about each party's obligations to form the basis for a contract. Additionally, expected future revenues from customers under short-term and long-term training contracts are included when these customers commit to pay us training fees, or when we reasonably expect the revenue to be generated;
- For the Defense and Security segment, we consider an item part of our order intake when we have a legally binding commercial agreement with a client that includes enough detail about each party's obligations to form the basis for a contract. Defense and Security contracts are usually executed over a long-term period but some of them must be renewed each year. For this segment, we only include a contract item in order intake when the customer has authorized the contract item and has received funding for it;
- For the Healthcare segment, order intake is typically converted into revenue within one year, therefore we assume that order intake is equal to revenue.

The book-to-sales ratio is the total orders divided by total revenue in a given period.

Backlog

Total backlog is a non-GAAP financial measure that represents expected future revenues and includes obligated backlog, joint venture backlog and unfunded backlog and options:

- Obligated backlog represents the value of our order intake not yet executed and is calculated by adding the order intake of the current period to the balance of the obligated backlog at the end of the previous fiscal year, subtracting the revenue recognized in the current period and adding or subtracting backlog adjustments. If the amount of an order already recognized in a previous fiscal year is modified, the backlog is revised through adjustments;
- Joint venture backlog is obligated backlog that represents the expected value of our share of orders that our joint ventures have received but have not yet executed. Joint venture backlog is determined on the same basis as obligated backlog described above;
- Unfunded backlog represents firm Defense and Security orders we have received but have not yet executed and for which funding
 authorization has not yet been obtained. Options are included in backlog when there is a high probability of being exercised, but
 indefinite-delivery/indefinite-quantity (ID/IQ) contracts are excluded. When an option is exercised, it is considered order intake in
 that period and it is removed from unfunded backlog and options.

Simulator equivalent unit (SEU)

Simulator equivalent unit

SEU is a supplementary financial measure we use to show the total average number of FFSs available to generate earnings during the period. For example, in the case of a 50/50 flight training joint venture, we will report only 50% of the FFSs under this joint venture as a SEU. If a FFS is being powered down and relocated, it will not be included as a SEU until the FFS is re-installed and available to generate earnings.

Full-flight simulators (FFSs) in CAE's network

A FFS is a full-size replica of a specific make, model and series of an aircraft cockpit, including a motion system. In our count of FFSs in the network, we generally only include FFSs that are of the highest fidelity and do not include any fixed based training devices, or other lower-level devices, as these are typically used in addition to FFSs in the same approved training programs.

Utilization rate

Utilization rate is one of the supplementary financial measures we use to assess the performance of our Civil simulator training network. While utilization rate does not perfectly correlate to revenue recognized, we track it, together with other measures, because we believe it is an indicator of our operating performance. We calculate it by taking the number of training hours sold on our simulators during the period divided by the practical training capacity available for the same period.

5.2 Non-GAAP measure reconciliations

Reconciliation of adjusted segment operating income

Adjusted EPS excluding COVID-19 government support programs ³	\$	0.06	0.29	0.19	0.17	0.15

Revenue was 24% higher compared to the first quarter of fiscal 2022

Revenue was \$180.6 million higher compared to the first quarter of fiscal 2022. Increases in revenue were \$125.1 million, \$47.5 million and \$8.0 million from Defense and Security, Civil Aviation and Healthcare respectively.

You will find more details in Results by segment.

Gross profit was \$19.1 million higher compared to the first quarter of fiscal 2022

Gross profit was \$232.9 million this quarter, or 25.0% of revenue, compared to \$213.8 million, or 28.4% of revenue, in the first quarter of fiscal 2022.

Adjusted segment operating income was \$37.5 million lower compared to the first quarter of fiscal 2022

Operating income this quarter was \$39.4 million (4.2% of revenue), compared to \$86.2 million (11.5% of revenue) in the first quarter of fiscal 2022. Adjusted segment operating income was \$60.9 million this quarter (6.5% of revenue), compared to \$98.4 million (13.1% of revenue) in the first quarter of fiscal 2022. Decreases in adjusted segment operating income were \$44.9 million and \$9.5 million from Defense and Security and Healthcare respectively, partially offset by an increase of \$16.9 million from Civil Aviation.

You will find more details in Results by segment.

³ Non-GAAP and other financial measures (see Section 5).

Net finance expense was 27% higher compared to the first quarter of fiscal 2022

The increase was mainly due to higher finance expense from a higher level of long-term debt and lower finance income, partially offset by higher borrowing costs capitalized.

Income tax rate was negative 16% this quarter

Income tax recovery this quarter amounted to \$0.5 million, representing a negative effective tax rate of 16%, compared to positive effective tax rate of 18% for the first quarter of fiscal 2022.

The income tax rate was impacted by restructuring, integration and acquisition costs this quarter. Excluding the effect of these elements, the income tax rate would have been 21% this quarter compared to 19% in the first quarter of fiscal 2022. On this basis, the increase in the tax rate this quarter compared to the first quarter of fiscal 2021 was mainly attributable to a beneficial impact last year, recognized on tax assets, partially offset by the change in the mix of income from various jurisdictions.

6.2 Restructuring, integration and acquisition costs

	Three r	nonth	s ended
		June 3	30, 2022
(amounts in millions)	2022		2021
Integration and acquisition costs	\$ 16.7	\$	5.4
Impairment of non-financial assets	2.3		2.1
Severances and other employee related costs	_		1.3
Other costs	2.5		3.4
Total restructuring, integration and acquisition costs	\$ 21.5	\$	12.2

For the three months ended June 30, 2022, restructuring, integration and acquisition costs associated with the L3H MT acquisition amounted to \$9.5 million and the AirCentre acquisition amounted to \$6.4 million.

For the three months ended June 30, 2022, payments of approximately \$23 million (2021 – \$10 million) were recorded in cash provided by operating activities related to the integration and acquisition costs for our recently acquired businesses and severances and other costs associated with our previously announced restructuring program.

6.3 Consolidated orders and total backlog

Total backlog⁴ up 5% compared to last quarter

	Three months ended			
(amounts in millions)	June	30, 2022		
Obligated backlog ⁴ , beginning of period	\$	7,871.4		
+ order intake ⁴		1,049.1		
- revenue		(933.3)		
+ / - adjustments		24.9		
Obligated backlog, end of period	\$	8,012.1		
Joint venture backlog ⁴ (all obligated)		276.3		
Unfunded backlog and options ⁴		1,737.2		
Total backlog	\$	10,025.6		

Adjustments this guarter were mainly due to positive foreign exchange movements, partially offset by contract amendments.

The book-to-sales ratio⁴ for the quarter was 1.12x. The ratio for the last 12 months was 1.30x.

You will find more details in Results by segment.

⁴ Non-GAAP and other financial measures (see Section 5).

7. RESULTS BY SEGMENT

We manage our business and report our results in three segments:

- Civil Aviation;
- Defense and Security;
- Healthcare.

The method used for the allocation of assets jointly used by the operating segments and costs and liabilities jointly incurred (mostly corporate costs) between operating segments is based on the level of utilization when determinable and measurable, otherwise the allocation is based on a proportion of each segment's cost of sales and revenue.

Unless otherwise indicated, elements within our segment revenue and adjusted segment operating income analysis are presented in order of magnitude.

7.1 Civil Aviation

FIRST QUARTER OF FISCAL 2023 EXPANSIONS AND NEW INITIATIVES

Expansions

- We announced the expansion of our commercial aviation training network in Toronto, Canada with the addition of a Boeing 737 MAX and 787 FFS;
- We announced the expansion of our business aviation training network in Burgess Hill, U.K. with the addition of the first Dassault Falcon 6X FFS;
- We announced the expansion of our business aviation footprint with the introduction of a new flight-training location in Savannah, Georgia. The centre is expected to open in mid-calendar 2023 and will be equipped with four Gulfstream FFSs.

New programs and products

- We concluded a strategic partnership with Vertical Aerospace to be their exclusive global provider of VX4 pilot training and courseware;
- Together with Piper Aircraft Inc., we launched our electric aircraft modification program, where we will develop a conversion kit and bring an electric variant option of the aircraft to market. As a carbon neutral company, this program will allow CAE to further reduce it's carbon footprint at the source;
- We have launched our newest advancement in pilot training, the CAE 700MXR flight simulator. This high-fidelity flight simulator targets the eVTOL aircraft pilot training and will provide cost-effective, realistic and scalable flight training.

ORDERS

Civil Aviation obtained contracts this quarter expected to generate revenues of \$521.5 million including contracts for 11 FFSs sold in the quarter, including:

- Two Boeing 737 MAX to Allegiant Air;
- Two Boeing 737 MAX to United Airlines;
- One ATR72 to Air New Zealand;
- One Airbus A220 to JetBlue;
- 5 FFSs to undisclosed and other customers.

Notable contract awards for the quarter included:

- A 3-year exclusive commercial aviation training agreement extension with Mesa Airlines;
- A 12-year exclusive commercial aviation training agreement with Virgin Atlantic to now include the Boeing 787 platform;
- A 3-year business aviation training agreement with Tag Aviation Holdings;
- A 3-year business aviation training agreement with NSPA (NATO Support and Procurement Agency);
- A 5-year exclusive commercial aviation training agreement with United Airlines;
- A 5-year exclusive commercial aviation training agreement with JetBlue.

FINANCIAL RESULTS

(amounts in millions, except SEU, FFSs, utilization rate

and FFS deliveries)		Q1-2023	Q4-2022	Q3-2022	Q2-2022	Q1-2022

FFSs in CAE's network⁵		318	316	312	312	319
Utilization rate ⁵	%	71	69	60	53	56
FFS deliveries		10	7	7	5	11

Revenue up 11% compared to the first quarter of fiscal 2022

The increase in revenue compared to the first quarter of fiscal 2022 was mainly due to higher utilization across our network and to the integration into our results of AirCentre, acquired in the fourth quarter of the prior year. The increase was partially offset by lower revenue recognized from simulator sales mainly due to lower deliveries, a less favourable program mix and lower revenue from simulator lifecycle support services.

We have seen continued recovery from the enduring impacts of the COVID-19 pandemic in regards to improved utilization of FFSs in our network and stronger order intake. However, as a result of the proliferation of new COVID-19 variants of the virus, we continue to be affected by ongoing supply chain disruptions, employee and customer absenteeism due to infections, operational constraints imposed by local authorities, and intermittent border restrictions with the greatest impact, during the quarter, in Asia.

Adjusted segment operating income up 24% compared to the first quarter of fiscal 2022

Adjusted segment operating income was \$86.6 million (18.0% of revenue) this quarter, compared to \$69.7 million (16.1% of revenue) in the first quarter of fiscal 2022.

The increase compared to the first quarter of fiscal 2022 was mainly due to higher utilization across our network. The increase was partially offset by lower revenue recognized from simulator sales, mainly due to lower revenue from simulator lifecycle support services, lower deliveries and a less favourable program mix, and by higher net research and development costs due to investments related to innovation programs.

Property, plant and equipment expenditures at \$68.1 million this quarter

Growth capital expenditures were \$53.8 million for the quarter and maintenance capital expenditures were \$14.3 million.

Capital employed increased by \$107.0 million compared to last quarter

The increase compared to last quarter was driven mainly by higher non-cash working capital, due to higher accounts receivable, higher property, plant and equipment and movement in foreign exchange rates.

⁵ Non-GAAP and other financial measures (see Section 5).

Total backlog up 2% compared to last quarter

	Three months ended June 30, 2022			
(amounts in millions)				
Obligated backlog, beginning of period	\$	4,718.3		
+ order intake		521.5		
- revenue		(480.4)		
+ / - adjustments		58.4		
Obligated backlog, end of period	\$	4,817.8		
Joint venture backlog (all obligated)		175.4		
Total backlog	\$	4,993.2		

Adjustments this guarter were mainly due to positive foreign exchange movements, partially offset by contract amendments.

This quarter's book-to-sales ratio was 1.09x. The ratio for the last 12 months was 1.32x.

7.2 Defense and Security

FIRST QUARTER OF FISCAL 2023 EXPANSIONS AND NEW INITIATIVES

Expansions

- We entered into a memorandum of understanding (MoU) with MBDA Deutschland to jointly develop virtual simulation environments that support the development, training and use of network-enabled, collaborative effectors to support the Future Combat Air System program and further develop the key technologies required for mission planning, collaborative algorithms and sensor data fusion;
- We entered into a MoU with Boeing to expand their collaboration and explore further teaming opportunities in defence aerospace training, leveraging the strengths, skills and advanced technologies of the two companies with the intent to further enhance innovation and competition through potential joint-offerings.

New programs and products

 The German government announced Boeing's CH-47F Chinook was selected for the heavy helicopter program. CAE GmbH is a member of Boeing's Team Chinook providing flight simulation technologies and training support services.

ORDERS

Defense and Security was awarded \$488.0 million in orders this guarter, including notable contract awards from:

- L3 Harris to provide Program Management, Integrated Logistics & Support, Data Management System and Embedded Systems Engineering support for the CF-18 Systems Engineering Support Contract to the Royal Canadian Air Force;
- Rotorsim, a joint venture between CAE and Leonardo, to provide the training system in support of the Joint NH90 Training Program Full Mission Flight Trainer Maintenance Upgrade to the Netherlands Ministry of Defence;
- The United States Special Operations Command that exercised the first option year for the Mission Command System Common Operational Picture;
- The U.S. Army Synthetic Training Environment Cross Functional Team with PEO STRI to develop a Soldier Virtual Trainer Prototype;
- The Air Force Research Laboratory Space Vehicles Directorate's Simulation & Technology Assessment Branch to develop a
 prototype to support testing, training, evaluation, and the development of tactics and systems for the Joint Warfighter.

FINANCIAL RESULTS

(amounts in millions)		Q1-2023	Q4-2022	Q3-2022	Q2-2022	Q1-2022
Revenue	\$	413.3	469.5	426.5	417.9	288.2
Operating (loss) income	\$	(30.3)	25.8	16.5	(8.9)	22.6
Adjusted SOI	\$	(21.2)	36.8	32.0	26.7	23.7
As a % of revenue	%	_	7.8	7.5	6.4	8.2
Adjusted SOI excluding COVID-19 government						
support programs	\$	(21.2)	36.8	32.0	26.7	15.7
As a % of revenue	%	_	7.8	7.5	6.4	5.4
Depreciation and amortization	\$	20.9	20.1	21.1	20.0	12.2
Property, plant and equipment expenditures	\$	5.2	6.0	6.5	5.7	3.4
Intangible assets and other assets expenditures	\$	6.8	6.9	9.0	3.5	5.5
Capital employed	\$	2,528.4	2,338.3	2,360.7	2,466.2	1,100.8
Total backlog	\$	5,032.4	4,658.3	4,571.2	4,564.7	3,733.7

Revenue up 43% compared to the first quarter of fiscal 2022

The increase in revenue compared to the first quarter of fiscal 2022 was mainly due to the integration into our results of L3H MT, acquired in the second quarter of the prior year.

Adjusted segment operating income decreased by \$44.9 million compared to the first quarter of fiscal 2022

Adjusted segment operating loss was \$21.2 million this quarter, compared to an adjusted segment operating income of \$23.7 million (8.2% of revenue) in the first quarter of fiscal 2022.

The decrease compared to the first quarter of fiscal 2022 was driven by lower margins on our North American programs, mainly from unfavourable contract profit adjustments, in the aggregate of \$28.9 million, on two programs: a classified U.S. program and a U.S. training utilization program. The unfavourable profit adjustments were required following the reassessment of cost estimates, due in part from, delays and meeting customer requirements on scope and timing as well as the revised expectations on the expansion of program requirements at more favourable terms, following recent communications with the customers. The decrease was also due to lower government support programs obtained in relation to the COVID-19 pandemic and higher selling, general and administrative expenses from higher bid and proposal costs associated with the pursuit of a larger Defense and Security pipeline.

In addition, we are impacted by delayed customer contract negotiations, inefficiencies from inflation and supply chain disruptions, employee and customer absenteeism due to infections and skilled labour shortages as a result of the proliferation of new COVID-19 variants of the virus, the Continuing Resolution in the U.S. and government contract award reprioritizations due to the Russian invasion of Ukraine. These impacts are driving delays in order intake, particularly for products contract awards and inefficiencies in the execution of certain programs.

Capital employed increased by \$190.1 million compared to last quarter

The increase compared to last quarter was mainly due to higher non-cash working capital, primarily resulting from lower accounts payable and accrued liabilities and higher accounts receivable and movements in foreign exchange rates

Total backlog up 8% compared to last quarter

	Three months ended
(amounts in millions)	June 30, 2022
Obligated backlog, beginning of period	\$ 3,153.1
+ order intake	488.0
- revenue	(413.3)
+ / - adjustments	(33.5)
Obligated backlog, end of period	\$ 3,194.3
Joint venture backlog (all obligated)	100.9
Unfunded backlog and options	1,737.2
Total backlog	\$ 5,032.4

Adjustments this guarter were mainly due to a contract amendment, partially offset by positive foreign exchange movements.

This quarter's book-to-sales ratio was 1.18x. The ratio for the last 12 months was 1.31x.

This quarter, \$483.2 million was added to the unfunded backlog and \$172.3 million was transferred to obligated backlog.

7.3 Healthcare

FIRST QUARTER OF FISCAL 2023 EXPANSIONS AND NEW INITIATIVES

Expansions

- We expanded our relationship with the Mayo Clinic College of Medicine and Science, finalizing a significant partnership for our LearningSpace center management solution for its simulation center in Rochester, Minnesota;
- Through efforts supported by CARES Act funding and Mon Health hospital system, we increased our presence and visibility in the U.S. to address West Virginia's increased demand for nurses by introducing three statewide mobile nursing labs that use simulation to train students and healthcare providers.

New programs and products

We introduced two new enhancements to our LearningSpace centre management platforms with the Standardized Patient Administration module that offers streamlined scheduling and communication with standardized patients via a dedicated mobile application and the updated NextGen Room View that optimizes the video interface for watching live or recorded simulation training sessions.

Awards and achievements

- As part of our ongoing commitment to be responsible stewards of the environment, our Sarasota manufacturing facility was named a Sarasota County Green Business recognizing the sustainable practices we've implemented to help conserve valuable resources, including air, water, and electricity;
- We joined our partner Microsoft at a thought leadership event, to showcase our collective innovation using mixed reality in medicine with our Vimedix ultrasound simulator and HoloLens2.

FINANCIAL RESULTS

(amounts in millions)		Q1-2023	Q4-2022	Q3-2022	Q2-2022	Q1-2022
Revenue	\$	39.6	52.8	32.1	34.9	31.6
Operating (loss) income	\$	(5.7)	9.4	(8.1)	(1.8)	4.6
Adjusted SOI	\$	(4.5)	9.6	(2.7)	(1.3)	5.0
As a % of revenue	%	_	18.2	_	_	15.8
Adjusted SOI excluding COVID-19 government						
support programs	\$	(4.5)	9.6	(2.7)	(1.3)	4.6
As a % of revenue	%	_	18.2	_	_	14.6
Depreciation and amortization	\$	3.2	3.1	3.3	3.2	3.4
Property, plant and equipment expenditures	\$	0.6	0.6	0.7	1.7	0.3
Intangible assets and other assets expenditures	\$	2.9	2.6	2.9	2.8	4.0
Capital employed	\$	220.2	204.3	193.7	210.1	185.9

Revenue up 25% compared to the first quarter of fiscal 2022

The increase in revenue compared to the first quarter of fiscal 2022 was mainly due to higher revenue from patient simulators, key partnerships with OEMs and ultrasound simulators. We continue to see gradual improvements in the recovery from COVID-19 although constrained by continued supply chain headwinds.

Adjusted segment operating income down \$9.5 million compared to the first quarter of fiscal 2022

Adjusted segment operating loss was \$4.5 million this quarter, compared to an adjusted segment operating income of \$5.0 million (15.8% of revenue) in the first quarter of fiscal 2022.

The decrease compared to the first quarter of fiscal 2022 was mainly due to higher net research and development costs this quarter and the recognition of previously unrecognized investment tax credits in the first quarter of fiscal 2022. The decrease was also due to higher investments in selling, general and administrative expenses to support business growth, partially offset by higher revenues as described above.

Capital employed increased by \$15.9 million compared to last quarter

The increase compared to last quarter was mainly due to higher non-cash working capital, driven by higher inventories due to a ramp-up of production to support additional revenue growth and to mitigate supply chain risk and lower accounts payable and accrued liabilities, partially offset by lower accounts receivable.

8. CONSOLIDATED CASH MOVEMENTS AND LIQUIDITY

We manage liquidity and regularly monitor the factors that could affect it, including:

- Cash generated from operations, including timing of milestone payments and management of working capital;
- Capital expenditure requirements;
- Scheduled repayments of long-term debt obligations, our credit capacity and expected future debt market conditions.

8.1 Consolidated cash movements

* before changes in non-cash working capital

Free cash flow of negative \$182.4 million this quarter

Free cash flow was \$34.8 million lower compared to the first quarter of fiscal 2022. The decrease was mainly due to lower cash provided by operating activities. The decrease was partially offset by a lower investment in non-cash working capital. We usually see a higher level of investment in non-cash working capital accounts during the first half of the fiscal year and tend to see a portion of these investments reverse in the second half.

Capital expenditures of \$73.9 million this quarter

Growth capital expenditures were \$57.0 million this quarter and maintenance capital expenditures were \$16.9 million.

⁶ Non-GAAP and other financial measures (see Section 5).

9. CONSOLIDATED FINANCIAL POSITION

9.1 Consolidated capital employed

	As	at June 30	As a	t March 31
(amounts in millions)		2022		2022
Use of capital:				
Current assets	\$	2,169.1	\$	2,148.6
Less: cash and cash equivalents		(206.0)		(346.1)
Current liabilities		(2,051.0)		(2,091.2)
Less: current portion of long-term debt		228.8		241.8
Non-cash working capital ⁷	\$	140.9	\$	(46.9)
Property, plant and equipment		2,170.8		2,129.3
Intangible assets		3,872.5		3,796.3
Other long-term assets		1,543.6		1,504.6
Other long-term liabilities		(547.8)		(596.6)
Total capital employed	\$	7,180.0	\$	6,786.7
Source of capital ⁷ :				
Current portion of long-term debt	\$	228.8	\$	241.8
Long-term debt		3,003.1		2,804.4
Less: cash and cash equivalents		(206.0)		(346.1)
Net debt ⁷	\$	3,025.9	\$	2,700.1
Equity attributable to equity holders of the Company		4,079.4		4,009.7
Non-controlling interests		74.7		76.9
Source of capital	\$	7,180.0	\$	6,786.7

Capital employed increased by \$393.3 million compared to last quarter

The increase was mainly due to higher non-cash working capital, lower other long-term liabilities, higher intangible assets and higher property, plant and equipment.

Return on capital employed (ROCE)⁷

ROCE was 3.3% this quarter. Adjusted ROCE was 5.2% this quarter, which compares to 6.7% in the first quarter of last year and 6.2% last quarter.

Non-cash working capital increased by \$187.8 million compared to last quarter

The increase was mainly due to higher accounts receivable and lower accounts payable.

Property, plant and equipment increased by \$41.5 million compared to last quarter

The increase was mainly due to capital expenditures in excess of depreciation.

Intangible assets increased by \$76.2 million compared to last quarter

The increase was mainly due to movements in foreign exchange rates and adjustments to the preliminary purchase price allocations of recently acquired businesses, partially offset by depreciation in excess of capital expenditures.

Other long-term liabilities decreased by \$48.8 million compared to last quarter

The decrease was mainly due to lower employee benefits obligations and lower deferred gains and other non-current liabilities.

⁷ Non-GAAP and other financial measures (see Section 5).

Net debt-to-adjusted EBITDA ⁸	4	1.15

We have a committed line of credit at floating rates, provided by a syndicate of lenders. We and some of our subsidiaries can borrow funds directly from this credit facility to cover operating and general corporate expenses and to issue letters of credit.

We manage an uncommitted receivable purchase facility of up to US\$400.0 million, in which we sell interests in certain of our accounts receivable to third parties for cash consideration. This committed facility is renewed annually.

We have certain debt agreements which require the maintenance of standard financial covenants. As at June 30, 2022, we are compliant with all our financial covenants.

Total available liquidity as at June 30, 2022 was approximately \$1.4 billion, including \$206.0 million in cash and cash equivalents, undrawn amounts on our revolving credit facility and the balance available under our receivable purchase facility.

Total equity increased by \$67.5 million this quarter

The increase in equity was mainly due to changes in other comprehensive income, driven by defined benefit plan remeasurements, stock options exercised and the net income realized this quarter.

Outstanding share data

Our articles of incorporation authorize the issue of an unlimited number of common shares and an unlimited number of preferred shares issued in series. We had a total of 317,669,400 common shares issued and outstanding as at June 30, 2022 with total share capital of \$2,237.9 million. In addition, we had 6,667,167 options outstanding under the Employee Stock Option Plan (ESOP).

As at July 31, 2022, we had a total of 317,809,175 common shares issued and outstanding and 6,416,377 options outstanding under the ESOP.

⁸ Non-GAAP and other financial measures (see Section 5).

10. CONTROLS AND PROCEDURES

In the first quarter ended June 30, 2022, we did not make any significant changes in, nor take any significant corrective actions regarding our internal controls or other factors that could significantly affect such internal controls. Our CEO and CFO periodically review our disclosure controls and procedures for effectiveness and conduct an evaluation each quarter. As of the end of the first quarter, our CEO and CFO were satisfied with the effectiveness of our disclosure controls and procedures.

During fiscal 2022, we acquired L3H MT and AirCentre. In accordance with National Instrument 52-109 - *Certification of Disclosure in Issuers' Annual and Interim Filings*, the CEO and the CFO of the Company have limited the scope of their design of CAE's disclosure controls and procedures and internal control over financial reporting to exclude controls, policies and procedures of L3H MT and AirCentre, for up to one year following their acquisition. We have begun to integrate their internal controls, policies and procedures and we have incorporated internal controls over significant processes specific to the acquisition that we believe are appropriate and necessary in consideration of the level of related integration. As the post-closing integration continues, we will continue to review the internal controls and processes with those of CAE.

L3H MT's contribution to our consolidated financial statements for the three months ended June 30, 2022 was 14% of consolidated revenues and less than 1% of adjusted segment operating income. Additionally, at June 30, 2022, L3H MT's total assets and total liabilities were 18% and 5% of consolidated total assets and total liabilities, respectively.

AirCentre's contribution to our consolidated financial statements for the three months ended June 30, 2022 was 4% and 3% of each of consolidated revenues and adjusted segment operating income. Additionally, as at June 30, 2022, AirCentre's total assets and total liabilities were 6% and 1% of consolidated total assets and total liabilities, respectively.

Notes to the Consolidated Interim Financial Statements

(Unaudited)

(Unless otherwise stated, all tabular amounts are in millions of Canadian dollars)

The consolidated interim financial statements were authorized for issue by the board of directors on August 10, 2022.

NOTE 1 – NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of operations

CAE equips people in critical roles with the expertise and solutions to create a safer world. As a technology company, CAE digitalizes the physical world by deploying simulation training and critical operations support solutions.

CAE Inc. and its subsidiaries' (or the Company) operations are managed through three segments:

- (i) Civil Aviation Provides comprehensive training solutions for flight, cabin, maintenance and ground personnel in commercial, business and helicopter aviation, a complete range of flight simulation training devices, ab initio pilot training and crew sourcing services, as well as end-to-end digitally-enabled crew management, training operations solutions and optimization software;
- (ii) Defense and Security A platform agnostic, global training and simulation pure play focusing on ensuring mission readiness by integrating systems and solutions across all five domains for government organizations responsible for public safety;
- (iii) Healthcare Provides healthcare students and clinical professionals innovative, integrated and virtual education and training solutions, including interventional and imaging simulations, curricula, audiovisual debriefing solutions, centre management platforms and patient simulators.

CAE is a limited liability company incorporated and domiciled in Canada. The address of the main office is 8585 Côte-de-Liesse, Saint-Laurent, Québec, Canada, H4T 1G6. CAE common shares are traded on the Toronto Stock Exchange (TSX) and on the New York Stock Exchange (NYSE).

Seasonality and cyclicality of the business

The Company's business operating segments are affected in varying degrees by market cyclicality and/or seasonality. As such, operating performance over a given interim period should not necessarily be considered indicative of full fiscal year performance.

The Company's business, revenues and cash flows are affected by certain seasonal trends. In the Civil Aviation segment, the level of training delivered is driven by the availability of pilots to train, which tends to be lower in the second quarter as pilots are flying more and training less and thus, resulting in lower revenues. In the Defense and Security segment, revenue and cash collection tend to be higher in the second half of the year as contract awards and availability of funding are influenced by the government's budget cycle, which in the U.S. is based on a September year-end.

However, due to the continued impact from the COVID-19 pandemic results may not follow historical patterns.

Basis of preparation

The key accounting policies applied in the preparation of these consolidated interim financial statements are consistent with those disclosed in Note 1 of the Company's consolidated financial statements for the year ended March 31, 2022. These policies have been consistently applied to all periods presented. Certain amendments to accounting standards were applied for the first time on April 1, 2022, but did not have an impact on the consolidated interim financial statements of the Company. These condensed consolidated interim financial statements should be read in conjunction with the Company's most recent annual consolidated financial statements for the year ended March 31, 2022.

The consolidated interim financial statements have been prepared in accordance with Part I of the CPA Canada Handbook - Accounting, International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB) applicable to the preparation of interim financial statements, IAS 34, Interim Financial Reporting.

The functional and presentation currency of CAE Inc. is the Canadian dollar.

Use of judgements, estimates and assumptions

The preparation of the consolidated interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies, the reported amounts of assets and liabilities and disclosures at the date of the consolidated interim financial statements, as well as the reported amounts of revenues and expenses for the period reported. Actual results could differ from those estimates. Changes will be reported in the period in which they are identified. In preparing these consolidated interim financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements of the year ended March 31, 2022.

NOTE 2 – BUSINESS COMBINATIONS

During the three months ended June 30, 2022, the Company completed its final assessment of the fair value of assets acquired and liabilities assumed of L3Harris Technologies' Military Training business (L3H MT) acquired in fiscal 2022.

During the three months ended June 30, 2022, adjustments to preliminary purchase price allocations of acquisitions realized in fiscal 2022 resulted in increases of intangible assets of \$18.7 million, current liabilities of \$3.6 million, other long-term liabilities of \$2.8 million and other long-term assets of \$2.3 million, and decreases of current assets of \$13.2 million and deferred tax assets of \$1.4 million.

NOTE 3 – OPERATING SEGMENTS AND GEOGRAPHIC INFORMATION

The Company elected to organize its operating segments principally on the basis of its customer markets. The Company manages its operations through its three segments. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker.

The Company has decided to disaggregate revenue from contracts with customers by segment, by products and services and by geographic regions as the Company believes it best depicts how the nature, amount, timing and uncertainty of its revenue and cash flows are affected by economic factors.

Results by segment

The profitability measure employed by the Company for making decisions about allocating resources to segments and assessing segment performance is adjusted segment operating income. Adjusted segment operating income is calculated by taking operating income and excluding restructuring, integration and acquisition costs, and impairments and other gains and losses arising from significant strategic transactions or specific events, which gives an indication of the profitability of each segment because it does not include the impact of items not specifically related to the segment's performance.

The accounting principles used to prepare the information by operating segments are the same as those used to prepare the Company's consolidated financial statements. The method used for the allocation of assets jointly used by operating segments and costs and liabilities jointly incurred (mostly corporate costs) between operating segments is based on the level of utilization when determinable and measurable, otherwise the allocation is based on a proportion of each segment's cost of sales and revenue.

Capital expenditures by segment, which consist of additions to property, plant and equipment and intangible assets (excluding those acquired in business combinations), are as follows:

	Three r	s ended June 30
	2022	2021
Civil Aviation	\$ 83.8	\$ 80.0
Defense and Security	12.0	8.9
Healthcare	3.5	4.3
Total capital expenditures	\$ 99.3	\$ 93.2

Assets and liabilities employed by segment

The Company uses assets employed and liabilities employed to assess resources allocated to each segment. Assets employed include accounts receivable, contract assets, inventories, prepayments, property, plant and equipment, right-of-use assets, intangible assets, investment in equity accounted investees, derivative financial assets and other non-current assets. Liabilities employed include accounts payable and accrued liabilities, provisions, contract liabilities, derivative financial liabilities and other non-current liabilities.

Assets and liabilities employed by segment are reconciled to total assets and liabilities as follows:

	June 30		March 31
		2022	2022
Assets employed			
Civil Aviation	\$	5,402.7	\$ 5,269.6
Defense and Security		3,294.6	3,163.1
Healthcare		282.3	269.2
Assets not included in assets employed		776.4	876.9

Healthcare		62.1	64.9
Liabilities not included in liabilities employed		3,734.8	3,589.8
Total liabilities	\$	5,601.9	\$ 5,492.2

Products and services information

The Company's revenue from external customers for its products and services are as follows:

	Three	s ended June 30
	2022	2021
Products	\$ 382.2	\$ 333.9
Training and services	551.1	418.8
Total external revenue	\$ 933.3	\$ 752.7

Geographic information

The Company markets its products and services globally. Revenues are attributed to geographical regions based on the location of customers. Non-current assets other than financial instruments and deferred tax assets are attributed to geographical regions based on the location of the assets, excluding goodwill. Goodwill is presented by geographical regions based on the Company's allocation of the related purchase price.

Other	(0.6)		(2.0)		
Finance income	\$ (2.9)	\$	(4.1)		
Finance expense – net	\$ 36.2	\$	28.6		

NOTE 7 – GOVERNMENT PARTICIPATION

Government contributions, other than COVID-19 government support programs, were recognized as follows:

	Three r	Three months of Ju 2022			
	2022		2021		
Credited to non-financial assets	\$ 3.1	\$	2.8		
Credited to income	5.9		4.8		
	\$ 9.0	\$	7.6		

COVID-19 government support programs

The Company previously accessed government emergency relief measures and wage subsidy programs available around the world, mainly the Canada Emergency Wage Subsidy (CEWS) program. The Company's participation in the CEWS program ceased on June 5, 2021 and accordingly, the Company did not claim any CEWS benefits for wages and salary costs incurred subsequent to June 5, 2021.

During the three months ended June 30, 2022, the Company received no government contributions related to COVID-19 support programs (2021 – \$14.9 million received, mainly provided as a reimbursement of employee wages, of which \$1.3 million were credited to non-financial assets and \$13.6 million were credited to income).

NOTE 8 – EARNINGS PER SHARE

Earnings per share computation

The denominators for the basic and diluted earnings per share computations are as follows:

	Three	months ended June 30
	2022	2021
Weighted average number of common shares outstanding	317,093,423	293,601,934
Effect of dilutive stock options	1,086,027	2,184,855
Weighted average number of common shares outstanding		
for diluted earnings per share calculation	318,179,450	295,786,789

For the three months ended June 30, 2022, options to acquire 2,229,865 common shares (2021 - 3,700) have been excluded from the above calculation since their inclusion would have had an anti-dilutive effect.

NOTE 9 – SUPPLEMENTARY CASH FLOWS INFORMATION

Changes in non-cash working capital are as follows:

Three months ended June 30	2022	2021
Cash (used in) provided by non-cash working capital:		
Accounts receivable	\$ (89.2)	\$ (21.8)
Contract assets	(0.4)	(28.5)
Inventories	(40.2)	79.5
Prepayments	(15.9)	(1.9)
Income taxes	(4.5)	(3.0)
Accounts payable and accrued liabilities	(98.0)	(179.0)
Provisions	(5.0)	(2.7)
Contract liabilities	22.9	(106.8)
	\$ (230.3)	\$ (264.2)

Supplemental information:

Three months ended June 30	20	22	2021
Interest paid	\$ 33	.5 \$	9.7
Interest received	3	.0	4.1
Income taxes paid	8	.5	14.4

NOTE 10 – FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is determined by reference to the available market information at the reporting date. When no active market exists for a financial instrument, the Company determines the fair value of that instrument based on valuation methodologies as discussed below. In determining assumptions required under a valuation model, the Company primarily uses external, readily observable market data inputs. Assumptions or inputs that are not based on observable market data incorporate the Company's best estimates of market participant assumptions. Counterparty credit risk and the Company's own credit risk are taken into account in estimating the fair value of financial assets and financial liabilities.

The following assumptions and valuation methodologies have been used to measure the fair value of financial instruments:

- (i) The fair value of cash and cash equivalents, accounts receivable and accounts payable and accrued liabilities approximate their carrying values due to their short-term maturities;
- (ii) The fair value of derivative instruments, which include forward contracts, swap agreements and embedded derivatives accounted for separately and is calculated as the present value of the estimated future cash flows using an appropriate interest rate yield curve and forward foreign exchange rate. Assumptions are based on market conditions prevailing at each reporting date. The fair value of derivative instruments reflect the estimated amounts that the Company would receive or pay to settle the contracts at the reporting date;
- (iii) The fair value of the equity investments, which does not have a readily available market value, is estimated using a discounted cash flow model, which includes some assumptions that are not based on observable market prices or rates;
- (iv) The fair value of non-current receivables is estimated based on discounted cash flows using current interest rates for instruments with similar risks and remaining maturities;
- (v) The fair value of long-term debts, royalties obligations and other non-current liabilities are estimated based on discounted cash flows using current interest rates for instruments with similar risks and remaining maturities;
- (vi) The fair value of the contingent considerations arising on business combinations are based on the estimated amount and timing of projected cash flows, the probability of the achievement of the criteria on which the contingency is based and the risk-adjusted discount rate used to present value the probability-weighted cash flows.

Fair value hierarchy

The fair value hierarchy reflects the significance of the inputs used in making the measurements and has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices in markets that are not active) or indirectly (i.e. quoted prices for similar assets or liabilities);

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Each type of fair value is categorized based on the lowest level input that is significant to the fair value measurement in its entirety.

The carrying values and fair values of financial instruments, by category, are as follows:

				June 30			March 31
	Level	Car	rying value	2022 Fair value	Ca	arrying value	2022 Fair value
Financial assets (liabilities) measured at FVTPL							
Cash and cash equivalents	Level 1	\$	206.0	\$ 206.0	\$	346.1	\$ 346.1
Restricted cash	Level 1		2.1	2.1		1.9	1.9
Equity swap agreements	Level 2		(15.5)	(15.5)		(13.0)	(13.0)
Forward foreign currency contracts	Level 2		6.4	6.4		7.0	7.0
Contingent consideration arising on business combinations	Level 3		(3.9)	(3.9)		(3.7)	(3.7)
Derivative assets (liabilities) designated in a hedge relationsh	ір						
Foreign currency and interest rate swap agreements	Level 2		15.0	15.0		8.2	8.2
Forward foreign currency contracts	Level 2		3.0	3.0		8.3	8.3
Financial assets (liabilities) measured at amortized cost							
Accounts receivable ⁽¹⁾	Level 2		595.1	595.1		501.7	501.7
Investment in finance leases	Level 2		133.9	136.2		118.7	124.4
Advances to a portfolio investment	Level 2		10.0	10.0		10.5	10.5
Other assets ⁽²⁾	Level 2		24.2	24.2		25.0	25.0
Accounts payable and accrued liabilities ⁽³⁾	Level 2		(660.0)	(660.0)		(696.6)	(696.6)
Total long-term debt ⁽⁴⁾	Level 2		(2,851.2)	(2,825.6)		(2,658.8)	(2,765.4)
Other non-current liabilities ⁽⁵⁾	Level 2		(143.9)	(142.3)		(151.8)	(164.5)
Financial assets measured at FVOCI							
Equity investments	Level 3		1.4	1.4		1.4	1.4
		\$	(2,677.4)	\$ (2,647.9)	\$	(2,495.1)	\$ (2,608.7)

⁽¹⁾ Includes trade receivables, accrued receivables and certain other receivables.

(2) Includes non-current receivables and certain other non-current assets.

⁽³⁾ Includes trade accounts payable, accrued liabilities, interest payable and current royalty obligations.

⁽⁴⁾ Excludes lease liabilities. The carrying value of long-term debt excludes transaction costs.

⁽⁵⁾ Includes non-current royalty obligations and other non-current liabilities.

During the three months ended June 30, 2022, there were no significant changes in level 3 financial instruments.

NOTE 11 – RELATED PARTY TRANSACTIONS

The Company's outstanding balances with its equity accounted investees are as follows:

	June 30		March 31	
		2022	2022	
Accounts receivable	\$	47.6	\$	49.7
Contract assets		32.2		23.0
Other non-current assets		12.0		12.8
Accounts payable and accrued liabilities		4.6		5.1
Contract liabilities		40.3		46.5
Other non-current liabilities		1.5		1.5
