

CAE USA achieves AS9100 certification

Tampa, Florida, February 13, 2020 – (NYSE: CAE; TSX: CAE) – CAE USA recently achieved the AS9100 certification for its quality management system. AS9100 is the International Quality Management System standard specifically for the Aerospace and Defense industry.

The AS9100 quality standard provides suppliers with rigid requirements for creating and maintaining a comprehensive quality management system that helps ensure the provision of safe and reliable products to the aerospace and defense industry.

“While we have always been focused on providing our customers with quality products and services, this formal AS9100 certification is a well-earned achievement that illustrates our focus on quality management,” said Ray Duquette, President and General Manager, CAE USA. “Meeting the rigorous standards of AS9100 specific to aerospace and defense is another example of CAE’s industry leadership and further demonstrates that CAE is a world-class company.”

To achieve AS9100 certification, CAE USA was required to participate in a thorough review and audit process. After providing a written application to describe its quality management system and processes, CAE USA was then subject to on-site auditor reviews and assessments. As an AS9100-certified organization, CAE USA will now participate in ongoing audits to ensure compliance and protocols are continually followed and improved.

About CAE USA

CAE USA is part of CAE’s Defense & Security business unit with specific responsibility for serving the United States, South America and select international markets. CAE USA includes over 2,000 employees and is the largest segment within CAE’s Defense & Security business unit. CAE USA Mission Solutions Inc. is a subsidiary of CAE USA which operates under a Proxy Agreement with the United States government. The Proxy Agreement enables CAE USA MSI to pursue and execute higher-level security programs.

About CAE

CAE is a global leader in training for the civil aviation, defense and security, and healthcare markets. Backed by a record of more than 70 years of industry firsts, we continue to help define global training standards with our innovative virtual-to-live training solutions to make flying safer, maintain defense force readiness and enhance patient safety. We have the broadest global presence in the industry, with over 10,000 employees, 160 sites and training locations in over 35 countries. Each year, we train more than 220,000 civil and defence crewmembers, including more than 135,000 pilots, and thousands of healthcare professionals worldwide. www.cae.com

Steve Baigrie, Vice President, Operations holds the formal AS9100 certificate recently awarded to CAE USA.
